Alternatives New Developments In The War On Breast Cancer:

Breast Cancer Collaborative Management Jay K. Harness, 2021-04-29 Prominent specialists champion the view that contemporary management of breast or any cancer requires the partnership of physicians nurses social workers and all others whose special training and talents should be integrated for treating the whole patient Here is the book that sets forth the rationale for this nationwide emerging concept and the means for accomplishing it Dealing with total care of the whole patient this new classic text is written by and for surgeons radiation oncologists medical oncologist pathologists radiologists nurses social workers and others involved with the care and management of the patient with breast cancer **Manmade Breast Cancers** Zillah Eisenstein, 2018-08-06 A new understanding of humanity and feminism from the starting point of breast health is the ultimate goal of Zillah Eisenstein's political memoir of her family's experience with breast cancer The well known feminist author argues that politics always needs the personal and that the personal is never enough on its own Her return to the personal side of the political combines the two for a radicalized way of seeing viewing and knowing The author strives to bring together a critique of environmental damage and the health of women's bodies gain perspective on the role race plays as a factor in breast cancers and in political agendas link prevention and treatment and connect individual support and political change Eisenstein was sixteen when her forty five year old mother successfully battled breast cancer Her two sisters Sarah and Giah were in their twenties when they were diagnosed but neither of them survived She received her own diagnosis when she was forty Despite her family history however Eisenstein rejects the simple argument that genes are simply determining rather than liable to influence by external factors She also questions the dominance of the theory that breast cancer is caused by high lifetime exposure to estrogen Instead she views breast cancer as an environmental disease best understood in terms of ecological racial economic and sexual influences on individual women She uses the term manmade to indicate not only industrial carcinogens and other cultural causes but also the male dominated and defined scientific practices of research and treatment In response *Manmade Breast Cancers* offers a retelling of the meaning of breast cancer and a discussion of universal feminist issues about the body The author says she writes to discover a more just globe which will treasure the health of all of our bodies The emotional depth and intellectual breadth of her argument adds new dimensions to how we understand breast cancer **The Journey Beyond Breast Cancer** Virginia M. Soffa, 1994-05 Currently one out of every nine American women will be diagnosed with breast cancer at some time in her life Virginia Soffa who was diagnosed with breast cancer at age 38 takes a critical look at both conventional and alternative treatments and outlines a strategy to help women take an active role in preventing and treating the disease **Women Confront Cancer** Margaret Wooddell, David J. Hess, 1998-10 Each year hundreds of thousands of women are diagnosed with cancer and more and more frequently women are turning to alternative treatments to take control of their illnesses and their lives Information however has been scarce for women navigating through conventional and unconventional medicine Research funding

continues to support traditional cancer therapies Women Confront Cancer declares the need for new less toxic therapies and diagnostic procedures For the first time Women Confront Cancer unites the voices of women leaders who have breast cervical ovarian and other cancers Documenting the decision process the choices and the dilemmas these women faced as they chose alternative and complementary cancer treatments a powerful unity emerges pointing the way to the future of the diagnosis and treatment of cancer by less toxic methods Ann Frahm the author of A Cancer Battle Plan Susan Moss the author of Keep Your Breasts and Cathy Hitchcock coauthor of Breast Cancer are only three of the leaders who relate their personal experiences with cancer All of the women featured in Women Confront Cancer share how and why they created treatment programs that combine the best of conventional and unconventional approaches and how it has improved their health and their lives A call for patients rights for policy reform in cancer research for better information about both conventional and alternative medicine Women Confront Cancer will be both a source of inspiration for women who have cancer and an aid for them in creating their own approach to healing Did you know that October is NATIONAL BREAST CANCER AWARENESS MONTH and pink is the color that symbolizes breast cancer awareness **Breast Implants** United States. Alternatives Rose Kushner,1985 *The Biopolitics of Breast Cancer* Maren Klawiter,2008 For nearly forty years feminists and patient activists have argued that medicine is a deeply individualizing and depoliticizing institution According to this view medical practices are incidental to people s transformation from patients to patient activists The Biopolitics of Breast Cancer turns this understanding upside down Maren Klawiter analyzes the evolution of the breast cancer movement to show the broad social impact of how diseases come to be medically managed and publicly administered Examining surgical procedures adjuvant therapies early detection campaigns and the rise in discourses of risk Klawiter demonstrates that these practices created a change in the social relations if not the mortality rate of breast cancer that initially inhibited but later enabled collective action Her research focuses on the emergence and development of new forms of activism that range from grassroots patient empowerment to environmental activism and corporate funded breast cancer awareness The Biopolitics of Breast Cancer opens a window onto a larger set of changes currently transforming medically advanced societies and ultimately challenges our understanding of the origins politics and future of the breast cancer movement Maren Klawiter holds a PhD in sociology from the University of California Berkeley She is currently pursuing a law degree at Yale University *The Personal and the Political* Ulrike Boehmer,2000-05-04 An in depth consideration of women s activism in the AIDS and breast cancer movements *Beyond Slash, Burn, and Poison* Marcy Jane Knopf-Newman,2004 Drawing on the writings of Rachel Carson Betty Ford Rose Kushner and Audre Lorde this book explores the various ways in which patient centered texts continue to leave their mark on the political realm of breast cancer and ultimately the disease itself Ordered chronologically the selections trace the progression of discussions about breast cancer from a time when the subject was

kept private and silent to when it became part of public discourse The texts included are personal accounts written by women struggling to play an active role in their healing process and at the same time hoping to help others do the same

Feminist Judgments: Health Law Rewritten Seema Mohapatra, Lindsay Wiley, 2022-12-22 This volume provides an alternate history of health law by rewriting key judicial opinions from a feminist perspective Each chapter includes a rewritten opinion penned by a leading scholar relying exclusively on court precedents and scientific understanding available at the time of the original decision accompanied by commentary from an expert placing the case in historical context and explaining how the feminist judgment might have shaped a different path for subsequent developments It provides a map of the health law field where paternalism individualism gender stereotypes and tensions over the public private divide shape decisions about informed consent medical and nursing malpractice the relationships among health care professionals and the institutions where they work end of life care reproductive health care biomedical research ownership of human tissues and cells the influence of religious directives on health care standards health care discrimination long term care private health insurance Medicaid coverage the Affordable Care Act and more

The Politics of Breast Cancer Maureen Hogan Casamayou, 2001-03-26 Between 1990 and 1993 breast cancer activism became a significant political movement The issue began to receive extensive media attention and federal funding for breast cancer research jumped dramatically Describing the origins of this surge in interest Maureen Hogan Casamayou attributes it to the emergence of politically potent activism

among breast cancer survivors and their supporters Exploring the creation and development of the National Breast Cancer Coalition NBCC she shows how many of its key leaders were mobilized by their own traumatic experiences with the disease and its treatments Casamayou details the NBCC's meteoric rise and impressive lobbying efforts explaining how in contrast to grassroots movements founded by dedicated individuals the coalition grew from the simultaneous efforts of a network of women who invested their time energy money and professional skills in the fight for increased funding for breast cancer research This multiple leadership or collective entrepreneurialism says Casamayou was crucial to the NBCC's success framing the issue in the minds of the public and policymakers alike

Recovering Bodies G. Thomas Couser, 1997-11-01 This is a provocative look at writing by and about people with illness or disability in particular HIV AIDS breast cancer deafness and paralysis who challenge the stigmas attached to their conditions by telling their lives in their own ways and on their own terms Discussing memoirs diaries collaborative narratives photo documentaries essays and other forms of life writing G Thomas Couser shows that these books are not primarily records of medical conditions they are a means for individuals to recover their bodies or those of loved ones from marginalization and impersonal medical discourse Responding to the recent growth of illness and disability narratives in the United States such works as Juliet Wittman's *Breast Cancer Journal* John Hockenberry's *Moving Violations* Paul Monette's *Borrowed Time* An AIDS Memoir and Lou Ann Walker's *A Loss for Words* The Story of Deafness in a Family Couser addresses questions of both poetics and politics He examines why and under what circumstances individuals choose to write about illness or disability what role plot plays in such narratives how and whether closure is achieved who assumes the prerogative of narration which conditions are most often represented and which literary conventions lend themselves to representing particular conditions By tracing the development of new subgenres of personal narrative in our time this book explores how explicit consideration of illness and disability has enriched the repertoire of life writing In addition Couser's discussion of medical discourse joins the current debate about whether the biomedical model is entirely conducive to humane care for ill and disabled people With its sympathetic critique of the testimony of those most affected by these conditions *Recovering Bodies* contributes to an understanding of the relations among bodily dysfunction cultural conventions and identity in contemporary America

Building Genetic Medicine Shobita Parthasarathy, 2012-01-13 A comparative study of genetic testing for breast and ovarian cancer in the United States and Britain that shows the importance of national context in the development and use of science and technology even in an era of globalization In *Building Genetic Medicine* Shobita Parthasarathy shows how even in an era of globalization national context is playing an important role in the development and use of genetic technologies Focusing on the development and deployment of genetic testing for breast and ovarian cancer

known as BRCA testing in the United States and Britain Parthasarathy develops a comparative analysis framework in order to investigate how national toolkits shape both regulations and the architectures of technologies and uses this framework to assess the implications of new genetic technologies Parthasarathy argues that differences in the American and British approaches to health care and commercialization of research led to the establishment of different BRCA services in the two countries In Britain the technology was available through the National Health Service as an integrated program of counseling and laboratory analysis and was viewed as a potentially cost effective form of preventive care In the United States although BRCA testing was initially offered by a number of providers one company eventually became the sole provider of a test available to consumers on demand Parthasarathy draws lessons for the future of genetic medicine from these cross national differences and discusses the ways in which comparative case studies can inform policy making efforts in science and technology

Patient No More Sharon Batt,2003 Early Detection Kirsten Elizabeth Gardner,2006 Dispelling the common notion that American female cancer activism is a post 1970s phenomenon Kirsten E Gardner traces women s cancer education campaigns back to the early twentieth century Focusing on breast cancer but using research on cervical ovar
