Aircraft Aluminum Sheet in China

Since the successful design of the world's first all-metal monoplane made of aluminum by German Hans Reesell in 1912 and the development of 2017 alloy, the aviation industry has entered a period of rapid development.

In the past 100 years, the dominant position of aluminum alloy in aircraft body materials has not changed. Dozens of new aluminum alloys has been developed for the continuous development of the

World Aluminum Industry in a Changing Energy Era Merton J. Peck,2015-09-16 As a heavy user of electricity the primary
aluminium smelting industry is a leading example of the effects of variations in energy costs This title tells the story that with
the rise in energy costs three regions Japan the United States and Western Europe have become high cost locations for
primary aluminium production relative to three other regions Australia Brazil and Canada First published in 1988 this volume
presents an analysis of the public policy choices regarding the aluminium industry and electric power in both low cost power
countries and high cost power countries The World Aluminium Industry in a Changing Energy World is ideal for policy
