

BLOW FILL SEAL: **TECHNOLOGY & PROCESS**

EFFICACY

The BFS process does not require any pre-formed containers, as it starts directly from the polymer granule that is fed to the machine, where it is melted and extruded, thus eliminating the need for complicated or costly upstream equipment or particular storage space.

ASEPTICITY

BFS process takes place under sterile air shower in grade A, so the final product is already aseptic. However, if regulations require the product to be terminally sterilized, it can easily withstand terminal sterilization at 121°C as per normal procedures.

VERSATILITY

BFS technology is nowadays the preferred primary packaging solution not only by pharmaceutical companies and healthcare providers, wherever there is the need to package products at minimal cost ensuring contamination free packaging.

Success Is Just Running Out of Mistakes Stephen R. Ash, MD, FACP, 2023-03-29 About the Book Success is Just Running Out of Mistakes is about a life long quest to improve the therapy of kidney failure especially with hemodialysis technology Dr Ash began to write this because of a lack of progress in dialysis therapy He is tired of physicians and politicians saying that there is a lack of innovation among nephrologists The problem isn t lack of innovation but rather a failure to commercialize radically better new technology In some ways the book is also a collection of 12 case studies of new technology and ideas and how a small technology driven firm can succeed or fail in efforts to bring their new product to become a widespread market success There are few textbooks that describe not only successes of R D companies in bringing products to the market but also failures What is surprising about the failures described in this book is that they occurred at many different steps of bringing a new product to market The answer to a physician who says I have a new idea and think it could help medical therapy What should I do next is very long and complicated The one trait Success is Just Running Out of Mistakes really demonstrates is the importance of persistence Not just in any one project but in a career trying to make just one small part of medical therapy better for patients with kidney failure Too many young physicians don t realize the tough road ahead to make medical therapy better and quit after the failure of their first good idea As Winston
