Gee, Diana A. Worthington-White, 1990 This volume assesses research findings as well as the clinical aspects now in use for selectively separating subpopulations of cells from bone marrow It examines a full range of purging processes including transplantation programs cryopreservation cell isolation and cell growth specificity testing and quality control as well as the development of alternative sources of stem cells including peripheral blood and cadaveric marrow It also presents the conditions necessary to optimize graft toxicity and bone marrow transportation and addresses newer techniques of gene probing processing as well as mechanisms of genetic alteration including electroporation **Advances in Bone Marrow Purging and Processing** Diana A. Worthington-White, 1992 Surveys the latest research discoveries and current clinical procedures for selectively separating and analyzing subpopulations of cells from bone marrow Over 400 internationally renowned experts offer contributions on such topics as approaches for using DNA sense and antisense probes combinations of elutriators and immunomagnetism expanded cytokines applications new techniques for the removal of tumor cells from autologous bone marrow and T cells from allogeneic grafts *Advances in Bone Marrow Purging and Processing* Adrian P. cancer treatment The book summarizes an evolving science and a rapidly changing medical practice As we near the millennium it now becomes possible to envision a much more diversified system of cancer research and treatment that will afford greater opportunities for patients Some forms of cancer biotherapy use the strategy of tumour stabilization and control through continued biological therapy akin to the use of insulin in the treatment of diabetes This textbook illustrates new methods of thinking and new strategies for control of cancer It is always difficult to move from past dogma to future opportunity but this third edition of *Principles of Cancer Biotherapy* illustrates why it is so important to the patients for researchers and clinicians to explore and apply these new opportunities in cancer biotherapy

Trigger Factors in Transfusion Medicine C.Th. Smit Sibinga, P.C. Das, E.L. Snyder, 2012-12-06 It is an honour and a pleasure to welcome you all at this 20th annual International Symposium on Blood Transfusion in the Netherlands This year you celebrate its 20th anniversary and I congratulate the Staff of the Blood Bank Noord Nederland and especially Dr Smit Sibinga for this great achievement As most of you know the name of the person of Dr Smit Sibinga is unbreakably connected with the annual symposium in Groningen which he has organized each year from the very start 20 years ago The reputation of any symposium depends heavily on the

quality of the lectures I think it is not possible to organize 20 symposia in a row if the topics lack actual relevance and the speakers are not of excellent reputation Dr Smit Sibinga has proven to have a keen eye for selecting interesting themes and eminent speakers Although a lot of different topics have been dealt with in the past 20 years which each attracted the attention of a different group in the field of blood transfusion it is not surprising that after a tradition of 20 years several speakers but also a lot of attendees are not for the first time in Groningen to participate in this event It gives the symposium a unique atmosphere of intimacy It is not hard to admit that most of the newer developments in transfusion medicine take place outside the Netherlands
