COMBINING SCIENCE AND NATURE TO CONTROL CANCER

Dr. Douglas Brodie

Surviving advanced attacks by the medical establishment, Dr. Brodie is a fearless advocate of integrating alternative therapies to treat cancer. Dr. Brodie lives in Reno, NV with his wife Julie, a 19 year cancer survivor and living testimony of alternative care. He has dedicated his life to opening the eyes of the cancer establishment and all of us, that we may all finally recognize the role alternative treatments could play in the "War Against Cancer" if we have the courage to face the living realities it brings.

The quality that AACC is after.

"This book could save your life! Not only does it detail the many years of experience that Dr. Brodie has had in treating people with cancer, but it also gives people a lot of useful tips about both dietary and supplement use, to help prevent what is described above and the several biggest killers. This is most reading for everyone!"

Rx for Hope Nick Chen,David Tabatsky,2018-10-16 In our current era of rapidly developing cancer drugs and therapies we also see improvement of cancer treatment outcomes

stagnating when it comes to determining quality of life or long term survival This is because while new treatments are making small incremental progress in outcomes most cancer patients still depend on conventional methods that are both toxic and ineffective While new cancer drugs are becoming more precise or targeted less attention is being paid to the overall health and wellbeing of the patient which we propose is essential for long term cancer control and improving a patient s quality of life Rx for Hope backed by rigorous science and real life patient cases calls for an urgent reevaluation of the current conventional approach to cancer treatments and encourages a progressive treatment model combining metronomic low dose chemotherapy with complementary integrative medicine Along with new breakthrough immunotherapy drugs these treatments can potentially create a response powerful enough to not only eradicate the presence of cancer but also to prevent it from returning Because every 23 seconds someone in America is diagnosed with cancer the number of people affected is growing rapidly The American Cancer Society estimates that nearly two million new patients will need treatment in the coming year Judging by current trends and methods of treatment far too many of these people will be treated without the benefits of low dose chemotherapy and even less will enjoy the positive impact of immune supportive complementary integrative medicine Rx for Hope offers insight into a powerful way of treating cancer that patients and doctors can implement immediately for optimal results
