Japan's Response to the Gorbachev Era, 1985-1991 Gilbert Rozman, 2014-07-14 Gorbachev's transformation of both Soviet socialism and the Cold War world atmosphere kindled a far reaching debate in Japan Would Japan at last free itself of its secondary postwar standing Would a new Soviet system and world order soon be established Gilbert Rozman argues in Japan's Response to the Gorbachev Era that Japanese perceptions of the Soviet Union are distinctive and are helpful for understanding what will become an influential worldview Focusing on diverse opinion leaders and the relationship between the Japanese media policy making and public opinion Rozman shows how long standing negative images of Soviet socialism and militarism have been reconsidered since the mid 1980s His analysis treats burning issues such as the Northern Territories dispute the Soviet commitment to reform and the Soviet American relationship It also sheds light on Japanese views of Soviet history modernization and national character Such views reveal some of the building blocks for the emergent Japanese worldview Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Problems of Communism, 1991

Communism and Reform in East Asia (RLE Modern East and South East Asia) David S. G. Goodman, 2015-04-10 The West no longer regards communism in East Asia as a threat On the contrary because the communist party states of East Asia appear to be undergoing a process of reform directed primarily at economic modernization it is now regarded as a potential market The West's attitude is reinforced by the recognition of East Asia's economic importance more generally a perception which in itself undoubtedly stimulated reform in the region's communist party states The causes extent and consequences of reform in the East Asian communist party states are the concerns of the contributors to this volume first published in 1988 It includes chapters on the reform process in China North Korea Vietnam and Mongolia as well as examinations of the roles played by both China and the Soviet Union in the Asia Pacific region They demonstrate that a belief in a simple single process of economic and political liberalization brought about by the drive for economic modernization the production imperative is a misleading argument Although the production imperative might act as a stimulus to reform it is neither a sufficient nor even a necessary condition In individual countries the communist party's search for legitimacy a change of leadership or the relationship with the USSR have equally been the spur to reform The drive for economic

modernization may even be a consequence of the communist party's desire to reform rather than a cause. The absence of a uniform pattern does not detract from the potential consequences of economic and political change. These challenge socialist thinking on the nature of collective life, ownership and rural society. **The Reagan-Gorbachev Summit and Its**

Happened to the Soviet Union? Christopher I. Xenakis, 2002-09-30 Xenakis examines the responses of Soviet experts in American academia primarily political scientists but also economists and defense scholars who specialized in the USSR to the unfolding evidence of Soviet reform during the 1970s and 1980s and to its ultimate collapse. He concludes that American Sovietologists and other political scientists were more responsive to the Cold War consensus to the needs of the State Department Defense and CIA policy makers and to the official Washington line of the moment than to the changing face of the Soviet Union. As Xenakis makes clear many of the Cold War ideas and attitudes shared by Sovietologists the notion that the USSR was an evil empire the idea that Soviet society was irredeemably xenophobic and indolent that the Soviet political and economic system could not be fixed or reformed and the view that the best way for Washington to deal with Moscow's influence was to contain the USSR through arms races global and proxy wars were reminiscent of the policies and arguments of the Truman and Eisenhower administrations not to the facts on the ground in the 1970s and 1980s. An important work for scholars students and researchers involved with Soviet and Russian studies international political and military affairs intellectual history and the relationship between academia and the government. Know Your Enemy David C. Engerman, 2009-11-20 As World War II ended few Americans in government or universities knew much about the Soviet Union As David Engerman shows in this book a network of scholars soldiers spies and philanthropists created an enterprise known as Soviet Studies to fill in this dangerous gap in American knowledge This group brought together some of the nation's best minds from the left right and center colorful and controversial individuals ranging from George Kennan to Margaret Mead to Zbigniew Brzezinski not to mention historians Sheila Fitzpatrick and Richard Pipes Together they created the knowledge that helped fight the Cold War and define Cold War thought Soviet Studies became a vibrant intellectual enterprise studying not just the Soviet threat but Soviet society and culture at a time when many said that these were contradictions in terms as well as Russian history and literature And this broad network Engerman argues forever changed the relationship between the government and academe connecting the Pentagon with the ivory tower in ways that still matter today
