Feeding Wild Birds in America Paul J. Baicich, Margaret A. Barker, Carrol L. Henderson, 2015-03-30 Today according to the US Fish and Wildlife Service more than fifty million Americans feed birds around their homes and over the last sixty

years billions of pounds of birdseed have filled millions of feeders in backyards everywhere Feeding Wild Birds in America tells why and how a modest act of provision has become such a pervasive popular and often passionate aspect of people's lives Each chapter provides details on one or more bird feeding development or trend including the discovery of seeds the invention of different kinds of feeders and the creation of new companies Also woven into the book are the worlds of education publishing commerce professional ornithology and citizen science all of which have embraced bird feeding at different times and from different perspectives The authors take a decade by decade approach starting in the late nineteenth century providing a historical overview in each chapter before covering topical developments such as hummingbird feeding and birdbaths On the one hand they show that the story of bird feeding is one of entrepreneurial invention on the other hand they reveal how Americans through a seemingly simple practice have come to value the natural world
