The Manager's Guide to Competitive Marketing Strategies Norton Paley, 2006 HOW TO MAKE YOUR BUSINESS MORE PROFITABLE AND SUCCESSFUL THROUGH MARKETING Energy Antitrust Handbook Donald E. Hardy, 2002 The Energy Antitrust Handbook presents a guide to an industry of increasing importance to the U S economy The Handbook is designed to assist energy regulatory and antitrust lawyers in understanding the multilayered complexity of this field Historically energy has been at the center of the development of the antitrust laws The oil industry for example has been the source of many seminal antitrust cases while the electric and natural gas industries were considered to be the province of regulation However competition began to enter these two industries and develop particularly in the late 1980s and 1990s

This book provides a basic background of the history and economic structure of electricity and gas and the applicable regulatory structure. In addition, it explains the application of antitrust laws to these industries both by the courts and the agencies, particularly the Federal Energy Regulatory Commission (FERC). The Energy Antitrust Handbook also offers insight on how the past may be a prologue for issues that are currently in flux and reflects the greater attention being given to electricity issues by the courts and federal agencies. Lawyers familiar with antitrust will gain an understanding of gas and electricity product issues, the market structure, and the unique application of the antitrust laws to these industries. Lawyers and executives familiar with these industries but not with antitrust law will find this book provides both basic as well as pervasive coverage of the antitrust laws applicable to energy.

A Guide for Developing Zero Energy Communities John Whitcomb, 2014-11-26

A Planning Guide for Developing Zero Energy Communities also called The ZEC Guide helps developers, corporations, institutions, governments, utility companies, and communities create cities, campuses, and neighborhoods that by design conserve energy and incorporate electric vehicle charging using renewable energy to power those buildings and vehicles. ZECs provide a net balance of the supply and demand for local energy based on the National Renewable Energy Laboratory's (NREL) ZEC definition. The ZEC Guide addresses both Greenfield and Retrofit ZECs of various project sizes and complexities. The environmental impacts, regulatory issues, resistance, and economics are described. The ZEC Guide includes an extensive primer regarding renewable energy, control systems, energy storage, and hybridization of technologies. The guide provides a step-by-step process for evaluation and implementation and an explanation of how to create a ZEC program and align it with other sustainability and green building standards. Extensive references are provided for a multitude of relevant resources. The 202-page book includes forty-two photos and illustrations.

The Oxford Handbook of Food, Water and Society John Anthony Allan, Brendan Bromwich, Anthony Colman, Martin Keulertz, 2019

Society's greatest use of water is in food production, which makes farmers central to global environmental management. Current food value chains, however, do not enable farmers to both feed a growing population and steward natural resources. Through a carefully curated collection of articles written by water and food system scientists and professionals, including farmers, this Oxford Handbook considers the interconnected issues of real water in the environment and virtual water in food value chains and investigates society's influence on both. This perspective highlights considerable challenges for food security and
