Interrogating Critical Pedagogy Pierre Wilbert Orelus, Rochelle Brock, 2014-11-13 Educators teacher practitioners and social activists have successfully used critical pedagogy as a tool to help marginalized students develop awareness and seek alternative solutions to their poor educational and socioeconomic situations However this theory is often criticized as being mostly dominated by privileged white males bringing issues of race and gender to the forefront This volume provides insight on how

critical pedagogy can be helpful to scholars and teachers alike in their analysis of racial gender linguistic and political problems It features a wide range of respected scholars who examine the way and the degree to which critical pedagogy can be used to improve education for students of color women and other marginalized groups Resources in Education,2001-04 The Price They Paid Vivian Gunn Morris,Curtis L. Morris,2002-07-25 In this compelling book Curtis and Vivian Morris put a human face on desegregation practices in the South Focusing on an African American community in Alabama they document not only the gains but also the significant losses experienced by students when their community school was closed and they were forced to attend a White desegregated school across town This in depth volume includes A letter by Dr William Hooper Councill and speeches by George Washington Trenholm two African American leaders who worked with communities to provide quality schooling for African American children during segregation An insider s view of what life was like inside a segregated African American school including interviews with graduates who discuss how it felt to be in a caring and nurturing school that provided an atmosphere much like that of a family Actual events that demonstrate the profound negative impact of using skin color and race as a basis for preferential treatment including testimonials from parents and students who experienced racial discrimination in their new school A valuable look at the unmet promises of school desegregation that can help us provide a quality education for all children in the 21st century Handbook of Classroom Management Carolyn M. Evertson,Carol S. Weinstein,2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars

teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management

Narrowing the Achievement Gap Susan J. Paik, Herbert J. Walberg, 2007-06-04 The subject of minority children's learning has long been the concern of civic leaders parents scholars and educators The federal legislation No Child Left Behind emphasizes the concern even more It specifically requires assessing the academic achievement of minority students particularly in economically disadvantaged areas and holding schools accountable for their progress Schools that fail to attain Adequate Yearly Progress face the real possibility of being forced to close if they continually fail to perform Unlike the past these are increasingly high stakes consequences for educators parents students and the schools that serve them This book is timely and relevant because it addresses these issues and recommends solutions for Latino Black and Asian students This book also has implications for the problems the nation faces in helping all students to learn well particularly those that lag in academic achievement In considering the broad problems and in recommending solutions the book provides breadth concision and unique organization As the introductory chapter makes clear the book simultaneously considers not only the three most visible minority groups in the U S but draws upon the perspectives of anthropology education ethnic studies psychology and sociology From these several perspectives this book is organized within three broad sections 1 culturally diverse families and schooling 2 issues of immigration and schooling experiences and 3 socio cultural perspectives on teaching learning and development Within each section the authors marshal research literature regarding each ethnic minority group

The Color of Teaching June Gordon, 2002-11-01 One of the major concerns in education at present is how to recruit and attract more teachers from ethnic minorities In an attempt to move beyond the superficial and simplistic responses as to why these students are not entering teaching this book presents in depth interviews with over two hundred people from four ethnic groups African Americans Native Americans Asian Americans and Latinos These interviewees many of them teachers or education professionals express their attitude towards teaching and their understanding of why others may not choose teaching as a career One of the most significant and surprising findings is that regardless of academic or socio economic standing students from these ethnic groups tend not to be encouraged to enter the teaching profession by their own families communities and peers The book concludes with a discussion of programmatic changes and calls for the reconceptualization of the role of teachers Such changes can only arise out of a fundamental change in attitude of communities of color towards teaching which must be led by teachers themselves

Hello Professor Vanessa Siddle Walker, 2009-08-16 Like many black school principals Ulysses Byas who served the Gainesville Georgia school system in the 1950s and 1960s was reverently addressed by community members as Professor He kept copious notes and records throughout his career documenting efforts to improve the education of blacks Through conversations with Byas and access to his extensive archives on his principalship Vanessa Siddle Walker finds that black principals were well positioned in the community to serve as conduits of ideas

knowledge and tools to support black resistance to officially sanctioned regressive educational systems in the Jim Crow South Walker explains that principals participated in local regional and national associations comprising a black educational network through which power structures were formed and ideas were spread to schools across the South The professor enabled local school empowerment and applied the collective wisdom of the network to pursue common school projects such as pressuring school superintendents for funding structuring professional development for teachers and generating local action that was informed by research in academic practice The professor was uniquely positioned to learn about and deploy resources made available through these networks Walker s record of the transfer of ideology from black organizations into a local setting illuminates the remembered activities of black schools throughout the South and recalls for a new generation the role of the professor in uplifting black communities

Schoolhouse Activists Tondra L. Loder-Jackson, 2015-10-26 Schoolhouse Activists examines the role that African American educators played in the Birmingham Alabama civil rights movement from the late nineteenth century to the present day Drawing on multiple perspectives from education history and sociology Tondra L Loder Jackson revisits longstanding debates about whether these educators were friends or foes of the civil rights movement She also uses Black feminist thought and the life course perspective to illuminate the unique and often clandestine brand of activism that these teachers cultivated The book will serve as a resource for current educators and their students grappling with contemporary struggles for educational justice

African American Women Educators Karen A. Johnson, Abul Pitre, Kenneth L. Johnson, 2014-03-18 This book examines the lived experiences and work of African American women educators during the 1880s to the 1960s Specifically this text portrays an array of Black educators who used their social location as educators and activists to resist and fight the interlocking structures of power oppression and privilege that existed across the various educational institutions in the U S during this time This book seeks to explore these educators thoughts and teaching practices in an attempt to understand their unique vision of education for Black students and the implications of their work for current educational reform
