Fragments of the World: Uses of Museum Collections Suzanne

Keene, 2006-08-11 During the past decade a number of individual museums have found imaginative ways of using their collections and of making them accessible However museum collections as a whole are enormous in size and quantity and the question of how can they can be put to best use is ever present When conventional exhibitions can only ever utilise a tiny proportion of them what other uses of the collections are possible Will their exploitation and use now destroy their value for future generations Should they simply be kept safely and as economically as possible as a resource for the future Fragments of the World examines these questions first reviewing the history of collecting and of collections then discussing the ways in which the collections themselves are being used today Case studies of leading examples from around the world illustrate the discussion Bringing together the thinking about museum collections with case studies of the ways in which different types of collection are used the book provides a roadmap for museums to make better use of this wonderful resource

Kronfeldner,2014-09-11 Maria Kronfeldner examines how Darwinism has been used to explain novelty and change in culture through the Darwinian approach to creativity and the theory of memes The first claims that creativity is based on a Darwinian process of blind variation and selection while the latter claims that culture is based on and explained by units memes that are similar to genes Both theories try to describe and explain mind and culture by applying Darwinism by way of analogies Kronfeldner shows that the analogies involved in these theories lead to claims that give either wrong or at least no new descriptions or explanations of the phenomena at issue Whereas the two approaches are usually defended or criticized on the basis that they are dangerous for our vision of ourselves this book takes a different perspective it questions the acuteness of these approaches Darwinian theory is not like a dangerous wolf hunting for our self image Far from it in the case of the two analogical applications addressed in this book Darwinian theory is shown to behave more like a disoriented sheep in wolf's clothing **Directory of Special Libraries and Information Centers, [2004a]** ,2004 Creativity and Art Margaret A.
