Create Web Animations with Microsoft Liquid Motion Steven E. Callihan, 1998 A step by step instructional guide designed for the average computer user who is familiar with the basic Windows program and file operations and wants guidance in the use of Liquid Motion Microsoft's Web animation program Arrangement is in five tutorial sessions which show the basics of designing and publishing 3 D animations The included CD ROM contains shareware and trial versions of numerous related programs Annotation copyrighted by Book News Inc Portland OR *Creating Web Animations* Kirupa

Chinnathambi, 2017-03-20 Creating user interfaces that are fun practical fluid and memorable is hard And existing learning materials don't explain the context of the UI problem that animations are trying to solve That's where this book comes in You'll gain a solid technical understanding of how to create awesome animations using CSS and learn how to implement common UI patterns using practical examples that rely on animations to solve a core problem Frontend web developers and designers will not only learn important technical details but also how to apply them to solve real world problems **Tool support for collaborative creation of interactive storytelling media** Paula Klinke, Silvan Verhoeven, Felix Roth, Linus Hagemann, Tarik Alnawa, Jens Lincke, Patrick Rein, Robert Hirschfeld, 2022-09-21 Scrollytellings are an innovative form of web content Combining the benefits of books images movies and video games they are a tool to tell compelling stories and provide excellent learning opportunities Due to their multi modality creating high quality scrollytellings is not an easy task Different professions such as content designers graphics designers and developers need to collaborate to get the best out of the possibilities the scrollytelling format provides Collaboration unlocks great potential However content designers cannot create scrollytellings directly and always need to consult with developers to implement their vision This can result in misunderstandings Often the resulting scrollytelling will not match the designer's vision sufficiently causing unnecessary iterations Our project partner Typeshift specializes in the creation of individualized scrollytellings for their clients Examined existing solutions for authoring interactive content are not optimally suited for creating highly customized scrollytellings while still being able to manipulate all their elements programmatically Based on their experience and expertise we developed an editor to author scrollytellings in the lively next live programming environment In this environment a graphical user interface for content design is combined with powerful possibilities for programming behavior with the morphic system The editor allows content designers to take on large parts of the creation process of scrollytellings on their own such as creating the visible elements animating content and fine tuning the scrollytelling Hence developers can focus on interactive elements such as simulations and games Together with Typeshift we evaluated the tool by recreating an existing scrollytelling and identified possible future enhancements Our editor streamlines the creation process of scrollytellings Content designers and developers can now both work on the same scrollytelling Due to the editor inside of the lively next environment they can both work with a set of tools familiar to them and their traits Thus we mitigate unnecessary iterations

and misunderstandings by enabling content designers to realize large parts of their vision of a scrollytelling on their own Developers can add advanced and individual behavior Thus developers and content designers benefit from a clearer distribution of tasks while keeping the benefits of collaboration
