Heetland, 2020-07-21 A problem facing many churches today is the lack of strong leadership in the area of stewardship particularly the stewardship of financial resources Church leaders clergy and laity have had little or no training in this area and they feel uncomfortable and embarrassed in encouraging financial support for the church s ministries Failure to provide decisive leadership in this area has had negative consequences for the church including a decreasing percentage of charitable dollars directed toward churches and a growing lack of understanding among church members of the relationship between giving and spiritual growth Creating Generous Congregations is written to assist church leaders in gaining necessary expertise in the stewardship of financial resources so that persons will be invited to grow spiritually and the various ministries of the church will flourish **The Making of International Environmental**

Treaties Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law **Data Governance For Dummies**
