Constitutional Change and Constitutionalism in Africa ,2025-05-16 The new generation of African constitutions crafted in the 1990s marked the beginning of a trend that promised a radical transformation of the continent s governance landscape This movement aimed to eliminate the risks of coups and political instability that had plagued Africa since the 1960s by embedding democracy and constitutionalism However the wave of constitutional reforms post 1990s seems to have sparked a contagious fever of making unmaking and remaking constitutions The nature and frequency of these changes threaten to undermine the progress made in entrenching a culture of constitutionalism good governance and respect for the rule of law It is therefore no surprise that there is almost universal agreement that Africa is now facing a profound crisis of democracy and constitutionalism Constitutional Change and Constitutionalism in Africa examines the nature and extent of these changes which have been occurring more frequently and sometimes more arbitrarily than anticipated Among the main questions investigated are the constitution making process and the roles of various internal actors such as the legislature executive and judiciary as well as external actors like the African Union and Regional Economic Communities in the different processes of constitutional change Ultimately the discussions aim to explore how the processes of constitutional change whether inevitable and unavoidable or contrived can be conducted in a manner that does not undermine or threaten the efforts to entrench democracy constitutionalism good governance and respect for the rule of law on the African continent

L. Negretto,2013-06-17 Negretto provides the first systematic explanation of the origins of constitutional designs from an analytical historical and comparative perspective Based on analysis of constitutional change in Latin America from 1900 to 2008 and four detailed case studies Negretto shows the main determinants of constitutional choice are the past performance of constitutions in providing effective and legitimate instruments of government and the strategic interests of the actors who have influence over institutional selection The book explains how governance problems shape the general guidelines for reform while strategic calculations and power resources affect the selection of specific alternatives of design It emphasizes the importance of events that trigger reform and the designers level of electoral uncertainty for understanding the relative impact of short term partisan interests on constitution writing Negretto s study challenges predominant theories of institutional choice and paves the way for the development of a new research agenda on institutional change

Constitutional Origin and Norm Creation in Colombia Jan Boesten, 2022-04-27 This book explains the growing empowerment of the Colombian Constitutional Court in the early years of the 21st century and develops the concept of the deliberative judge Taking the case of the Colombian Constitutional Court and drawing on neoinstitutional theory to explain the relationship between political crisis and institutional reforms the book challenges the notion of rational choice institutionalism that agents act strategically It indicates the limits of path dependence and argues instead that discursive institutionalism is the most appropriate method for analyzing processes of institutional learning Combining theoretical and empirical research it builds the argument that judicial independence promotes the case for deliberative democracy over rational choice or strategic action approaches Finally the book suggests that by introducing communicative and cognitive variables in our understanding of key actors and processes we are more capable of bridging institutional origin and legacy The work will be a valuable resource for academics researchers and policy makers in Constitutional Law Constitutional Politics and Constitutional History

Constitutional Reform and Brexit Gary Wilson, 2023-06-30 This book examines the extent to which Brexit has impacted upon the operation of the British Constitution prompting in turn consideration of how some of the factors which contributed to the outcome of the 2016 referendum as well as the event of Brexit itself might inform debates surrounding constitutional reform moving forward The work seeks to make sense of the constitutional implications of Brexit and to revisit some of the key debates that have taken place in respect of particular constitutional reform proposals in order to assess the extent to which recent Brexit related developments inform the perspectives which are taken upon their merits and prospects The book is divided into two parts The first provides some context for the substantive treatment of the potential impact of Brexit on constitutional reform debates which forms the focus of Part II Part II centres on various specific constitutional reform themes or issues which are explored further within the context of Brexit For each such issue the main parameters of the debates which have taken place are sketched out before moving on to consider how it has informed or may come to be informed by the phenomenon of Brexit By so doing it looks to some future directions for constitutional reform which take account of the factors driving the discourses which gave rise to

the referendum outcome and subsequent developments as well as offering meaningful responses to these The book will be of interest to academics researchers and policy makers working in the areas of constitutional law constitutional politics philosophy and history

Constitutional Reform in Britain and France Elizabeth Gibson-Morgan, 2017-09-15 Any attempt at comparing contemporary change in the UK and France is a bold one since it means discussing two very different countries with strong distinctive constitutional identities This book places its emphasis on the shared historical political and cultural background of the UK and France before focusing on the sweeping transformation of their constitutional frameworks in the past quarter of a century at a national and regional level with a particular emphasis on Wales and Scotland which culminated in the June 2016 referendum on Britain's EU membership Instead of examining each country separately however as is traditional this study breaks new ground by explaining the pattern of institutional development in Britain and France from a comparative Franco British perspective It explores the complexities of recent constitutional change in both countries in an original and comprehensive way and gives both British and French readers a deeper understanding of the two countries that have some much in common even though Brexit could drive them apart

The Foundations and Traditions of Constitutional Amendment Richard Albert, Xenophon Contiades, Alkmene Fotiadou, 2017-07-13 There is growing interest in constitutional amendment from a comparative perspective Comparative constitutional amendment is the study of how constitutions change through formal and informal means including alteration revision evolution interpretation replacement and revolution The field invites scholars to draw insights about constitutional change across borders and cultures to uncover the motivations behind constitutional change to theorise best practices and to identify the theoretical underpinnings of constitutional change This volume is designed to guide the emergence of comparative constitutional amendment as a distinct field of study in public law Much of the recent scholarship in the field has been written by the scholars assembled in this volume This book like the field it hopes to shape is not comparative alone it is also doctrinal historical and theoretical and therefore offers a multiplicity of perspectives on a subject about which much remains to be written This book aspires to be the first to address comprehensively the new dimensions of the study of constitutional amendment and will become a reference point for all scholars working on the subject The volume covers all of the topics where innovative work is being done such as the notion of the people the trend of empirical quantitative approaches to constitutional change unamendability sunrise clauses constitutional referenda the conventional divide between constituent and constituted powers among other important subjects It creates a dialogue that cuts through these innovative conceptualisations and highlights scholarly disagreement and in so doing puts ideas to the test The volume therefore captures the fierce ongoing debates on the relevant topics it reveals the current trends and contested issues and it offers a variety of arguments elaborated by prominent experts in the field It will open the way for further dialogue
