*Handbook of Classroom Management* Carolyn M. Evertson,Carol S. Weinstein,2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management

Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore s African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn t necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore s decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr s book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools *Black Social Capital* offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change *Creating Engagement between Schools and their Communities* Carlos Azcoitia,Ted Purinton,2016-10-19

*Creating Engagement between Schools and their Communities* Lessons from Educational Leaders addresses how educational leaders have made efforts to reconnect their schools to their communities and the varied goals they achieved The contributors of this book are educational leaders who have stayed committed to their neighborhoods and who have seen the moral imperative to provide equal opportunity to all students This book shares their experiences particularly looking at community based schools in urban impoverished or immigrant communities communities that often are disconnected from the political and economic centers of the country *Designing for Virtual Communities in the Service of Learning* Sasha Barab,Rob Kling,James H.
