Dreamed Up Reality Bernardo Kastrup,2011-06-16 A strong and growing intuition in society today is the idea that our thoughts create our own reality Yet it seems obvious that try as we might our lives are not quite what we fantasize Is the intuition thus wrong Through a rational methodic interpretation of meditative insights the validity of which is substantiated with a compelling scientific literature review the author constructs hypotheses that reconcile facts with intuition Mesmerizing narratives of his expeditions into the unconscious suggest an amazing possibility just as dreams are seemingly

autonomous manifestations of our psyche reality may be an externalized combination of the subconscious dreams of us all mixed as they are projected onto the fabric of space time Perhaps the laws of physics are an emergent by product of such synchronization of thoughts Through computer simulations the author explores the implications of these hypotheses with conclusions uncannily reminiscent of observed phenomena Country Music Records Tony Russell,Bob Pinson,2004-10-07 This discography documents in alphabetical order by artist every commercial country music recording including unreleased sides and indicates as completely as possible the musicians playing at every session as well as instrumentation This massive undertaking encompasses 2 500 artists 5 000 session musicians and 10 000 songs Summary histories of each key record company are also provided along with a bibliography The discography includes indexes to all song titles and musicians listed
