The archaeological review, 1889 **Art, Patronage, and Nepotism in Early Modern Rome** Karen J. Lloyd, 2022-08-19 Drawing on rich archival research and focusing on works by leading artists including Guido Reni and Gian Lorenzo Bernini Karen J. Lloyd demonstrates that cardinal nephews in seventeenth century Rome those nephews who were raised to the cardinalate as princes of the Church used the arts to cultivate more than splendid social status Through politically savvy frescos and emotionally evocative displays of paintings sculptures and curiosities cardinal nephews aimed to define nepotism as good Catholic rule Their commissions took advantage of their unique position close to the pope embedding the defense of their role into the physical fabric of authority from the storied vaults of the Vatican Palace to the sensuous garden villas that fused business and pleasure in the Eternal City This book uncovers how cardinal nephews crafted a seductively potent dialogue on the nature of power fuelling the development of innovative visual forms that championed themselves as the indispensable heart of papal politics The book will be of interest to scholars working in art history early modern studies religious history and political history Archaeological Review George Laurence Gomme, 1889 A journal of historic and pre historic antiquities The Iconographic Encyclopaedia of the Arts and Sciences: Architecture, 1888 **The Conte Du Graal Cycle** Thomas Hinton, 2012 A new study of the continuations to Chr tien s Conte du Graal shows their crucial influence on the development of Arthurian literature Chr tien de Troyes s late twelfth century Conte du Graal has inspired writers and scholars from the moment of its composition to the present day The challenge represented by its unfinished state was quickly taken up and over the next fifty years the romance was supplemented by a number of continuations and prologues which eventually came to dwarf Chr tien s text In one of the first studies to treat the Conte du Graal and its continuations as a unified work Thomas Hinton considers the whole corpus as a narrative cycle Through a combination of close textual readings and manuscript analysis the author argues that the unity of the narrative depends on a balanced tension between centripetal and centrifugal dynamics He traces how the authors scribes and illuminators of the cycle worked to produce coherence even as they contended with potentially disruptive forces multiple authorship differences of intention and changes in the relation between text audience and book Finally he tackles the long held orthodoxy that places the Perceval Continuations on the margins of literary history Widening the scope of enquiry to consider the corpus s influence on thirteenth century verse romances this study re situates the Conte du Graal cycle as a vital element in the evolution of Arthurian literature Thomas Hinton is Junior Research Fellow in Modern Languages at Jesus College Oxford
