This book provides a comprehensive overview of what Asian industrial clusters might teach us. At a time when the dynamics of the world's economy are increasingly being influenced by developments in Asia, the question takes on particular relevance because of the explosion of clusters and cluster policies throughout the region and because of the great variety of models which can be seen developing in the various countries. Based on robust empirical surveys and interviews conducted in China, Vietnam, Thailand, Malaysia, and Japan, the studies collected in this book were first debated at an international workshop in Lyon. From industrial districts to poles of competitiveness, these studies explored the transformation of traditional systems of activities or industrial districts to new networks ready for global competition or innovation and also the development of new agglomerations or scientific knowledge clusters. The wide range of case studies in this collection offers a rich store of theoretical and practical lessons for analysts, policy makers, and economists. The book will also be a useful guide for graduate students as well as researchers in economics, sociology, and political studies. **New Vision Of An Old Cluster, A - Untangling Coma Berenices** Alain Mazure, Fabienne Casoli, Florence Durret, Daniel Gerbal, 1998-08-15.
