Research Issues, 1979 *Illegal Drug Use Through The Lifecourse* David Moxon, Jaime Waters, 2016-10-04 Hidden older illegal drug users are a seldom researched group most research on illegal drug users instead focusses on the young or the institutionalised To counter this trend this book reports on a study of current hidden users of illegal drugs aged 40 and over These are individuals who have sustained illegal drug use over the long term largely away from the gaze of the authorities whilst living otherwise conventional lives holding down jobs raising families and so on Thus they have much to tell us about how illegal substances can be integrated into life over the long term how that integration intersects with other aspects of one's existence and how illegal drug use is ultimately shaped by changes in personal circumstances and wider social contexts Utilising insights from the life course perspective the development of the participants' use over their lives is analysed and placed in social context The book also details the nature of their current drug use Thus the book illustrates the place of illegal drugs in the lives of the participants and how this came to be over the decades as they also juggled work family and the everyday minutiae of life with their use The result is a unique look at the illegal drug use of an often ignored group of older drug users which charts the changing role that illegal drugs have played and continue to play in their lives

Drink and drug driving law Great Britain: Parliament: House of Commons: Transport Committee,2010-12-02 18% of all drivers killed in road accidents are over the drink drive limit In 2007 based on coroners data but only approximately 3% of drivers in the UK are stopped and tested for alcohol compared to the European average of 16% This report calls for the police to be given an additional power to permit preliminary breath tests as part of any designated drink drive enforcement operation Currently the police may stop any vehicle but can only test the driver s breath if there is an element of suspicion There is concern that a reduction in the blood alcohol concentration limit would send out mixed messages but that the aimed for effectively zero limit is too great a step at present Instead concentration should be on stricter enforcement of the current limit and public education It is felt that the success of Great Britain s drink driving policy to date is largely attributable to the deterrent effect of the current 12 month mandatory disqualification penalty and the Committee supports retaining that penalty The committee also calls for the improvement of the detection of drug driving and to strengthen public perception about the likelihood of drug drivers being caught by the police The Government s commitment to install drug screening devices in every police station by 2012 is welcomed though this interim measure should not eclipse the Government s aim over the medium term to develop and type approve a drug screening device for use at the roadside drawing on relevant experience of doing this in the other parts of the world **Patterns and consequences of drug use** United States.
