Drugs Why Say No:

How to Say No to Drugs Damian P. Kreske, Ronald J. Brogan, 2008 Providing young people with the facts about the dangers of drug use is the best way to help them make good decisions How to Say No to Drugs explains how drug use affects the body and can lead to addiction as well as how young people can avoid peer pressure to use drugs The book also includes the personal stories of teenagers who have gone through treatment to repair the damage their drug use did not only to them but also to their relationships with family and friends

Parents, Help Your Child Say No to Drugs Norman Leibrock, 2002-08-07 Books are like people each one has its own story My book is a story about teenagers with an addiction for drugs and the adverse effects these addictions have on their parents My hope is that this book will present a picture of the many changes that can present themselves in the lives of young people and parents in their battle with mind altering drugs Many parents unfortunately are lost in the complexities of our everyday busy lives and their minds are clouded to the problems that are developing before them Many of us are either oblivious to the problem of drugs or are too afraid to admit to ourselves that we do not know what to do if it happens in our families Parents are sadly convinced that drug addiction can never happen to their children My wife Jane and I had to face that sudden realization that drugs were destroying the life of our son I believe that my book when read in its entirety will give you the guidance and insight to help all parents and their children to fight drug addiction and to render proper guidance to those already in the grip of mind altering drugs This book will help to illuminate those hidden changes that drugs can bring into the lives of our children and teenagers and with it the effects it will have on those around them I hope and pray that the sharing of this valuable information along with my own experiences will be a positive force in the thinking of our teenagers and their loving parents My fellow parents it is of the utmost importance that no matter what happens and how tough it may get remember there is no other way but up Wherever you are and whatever the problem dont ever stop the fight against drug addiction I am aware that in the hard nosed world we live in there are a multitude of self help books and numerous concepts and scientific theories on how to successfully face your problems and bring about changes in your life But I have written my book for this reason that parents can be hopeful in a time of adversity suffering from a family drug addiction problem Let faith and understanding change your life around As parents we often read about drugs and the effects they have upon our children Invariably our many conversations will drift to the topic of drug addiction and whether our children are in fact using drugs and what we can do about it I remember sitting with a group of parents discussing drugs Although we all agreed that the rapid introduction of mind altering substances was a critical problem to our children not everyone was in agreement what we should and could do about this problem if it affects our family Some parents told us our family is very content since all our children are young this problem doesnt pertain to us at this time Some parents sat back and told me that their teenage children have never taken drugs They never had to discuss drugs with their children because they knew they would never touch them A third group of parents were honest enough to

admit that their teenage son was a drug addict for years and they didn't know it and when they found out about it they didn't know what to do about it Parents do these statements sound familiar Perhaps something you have heard before but shrugged it off as something you would never have to worry about I realize that this is a sad scenario but very true Too many parents are not taking the time to talk to their children and establish a drug free family when they are young and vulnerable The result has been too many young people becoming drug addicts Some of them could have been prevented or helped at a young age That initial help must come from us as their parents We must have a constant sense of awareness of this problem facing our children today Remember parents we cannot change the nature of the drug addict or his addiction but we can help

Drug and Alcohol Abuse Howard Thomas Jr. Milhorn, 2013-11-11
The lure of drugs and alcohol is capturing today's youth in its fatal grip and may ultimately destroy our nation's future generations. The vicious cycle of abuse is one that parents, teachers, counselors, and other citizens decry on a daily basis. Dr. Thomas Milhorn, an expert on adolescent drug abuse, provides crucial information on all the major drugs of abuse including depressants, narcotics, stimulants, cannabinoids, inhalants, steroids, and hallucinogens and their lethal consequences. Dr. Milhorn contends that in order to confront the monster that is destroying our children's health and quality of life, we must first understand the psyche of drug and alcohol abusers and the natural progression of the disease of addiction. This respected physician and physiologist reveals the harmful combinations currently in vogue in the drug world and the short and long term effects they have on the body and discusses ways to recognize and pinpoint the telltale signs of a user. He explores the question of why adolescents abuse drugs as well as special issues affecting young female addicts. This powerful book also examines the fatal relationship between drugs and AIDS and includes a brief history of AIDS and lifesaving advice on AIDS prevention. Dr. Milhorn skillfully assesses the various inpatient and outpatient treatment choices. He realistically portrays the intense physical and emotional stages the user will pass through before becoming drug free as well as the stresses placed upon families during the recovery process. As this valuable book relates both parents and teachers have clearly defined roles and each can use his or her own brand of influence to aid the adolescent on the journey back to a healthy mind and body. Finally, Dr. Milhorn presents a list of successful options available if a first treatment attempt should fail. We live in a society where 12 year olds are budding alcoholics and children are bombarded in school hallways with solicitations to experiment with illicit drugs. With the practical wisdom of this authoritative and accessible guide, we can learn the techniques that will save our next generation from ruining their lives through hopeless addiction.
