Dry Cleaning and Degreasing Chemicals and Processes Maurice William Ranney,1973 Detergency of Specialty Surfactants Floyd Friedli, 2001-02-07 This volume seeks to advance cost effective methods using newly developed surfactants It summarizes data from physical chemical surface detergency cleaning toxicity and environmental sources for designing new formulations of classic organic head tail surfactants in response to increased environmental toxicity safety and performance **Environmental Investigation and Remediation** Thomas K.G. Mohr, 2016-04-19 A ubiquitous largely overlooked groundwater contaminant 1 4 dioxane escaped notice by almost everyone until the late 1990s While some dismissed 1.4 dioxane because it was not regulated others were concerned and required testing and remediation at sites they oversaw Drawing years of 1 4 dioxane research into a convenient resource Environmental The Complete Technology Book on Chemical Industries NIIR Board, 2003-08-03 In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace Chemical Industry in India is one of the fastest growing industries under the Indian economy The chemical industry comprises the companies that produce industrial chemicals Central to the modern world economy it converts raw materials into more than 70 000 different products Chemicals have contributed in various sectors like food industry fertilizers perfumery fragrance and flavour etc Chemicals are used to make a wide variety of consumer goods as well as thousands inputs to agriculture manufacturing construction and service industries There are numerous chemicals produced in chemical industry for example chloroform caffeine fertilizers dyes drug intermediates herbicide inorganic salts copper sulphate acetaldehyde etc The chemical industry itself consumes 26 percent of its own output The Chemical Industry in India is based on the idea of diversification For example inorganic chemicals is the sector where the growth rate is near about 9% and the chemicals produced in this sector are mainly used in alkalis fertilizers etc Depending on the product categories the chemical industry is divided in many other sectors like drugs and pharmaceuticals fertilizers fine chemicals like dyes and paints etc The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12% This book majorly deals with the molecular formula raw materials properties laboratory testing manufacturing process explained with flow diagrams and uses of the chemicals The major contents of the book are inorganic salts inorganic chemicals industrial gas fertilizers alum caffeine ceramic chemicals etc This book covers the production of more than 100 chemicals for example acetanilide methylamine butylamine linalol phosphorous salicylic acid etc This book should be of great value to young chemical engineers and chemists who are just entering the field but those already practicing will find much of interest and use for broadening of their insight in to fields in which they are only marginally informed It is hoped that this book will aid to young engineers chemical civil mechanical and electrical as well as chemists in understanding the value of chemical the type of problems met in their production and method for solving these problems TAGS Chemical Manufacturing
