Empire, Industry and Class Anthony Cox, 2013-04-02 Presenting a new approach towards the social history of working classes in the imperial context this book looks at the formation of working classes in Scotland and Bengal It analyses the trajectory of labour market formation labour supervision cultures of labour and class formation between two regional economies one in an imperial country and the other in a colonial one The book examines the everyday lives of the jute workers of the imperial nexus and the impact of the Dundee School of Scottish mechanics engineers and managers who ran the Calcutta jute industry It goes on to challenge existing theories of imperialism class formation and class struggle particularly those that underline the exceptional nature of the Indian experience of industrialization and demonstrates how and why Empire was able to provide an opportunity to test and perfect ways of controlling the lower classes of Dundee These historical debates have a continued relevance as we observe the impact of globalization and rapid industrialization in the so called developing world and the accompanying changes in many areas of the developed world marked by de industrialization The book is of use to scholars of imperial history labour history British history and South Asian history

Politics and Paradigms Andrew C. Janos, 1986 Recent economic and political developments in the Third World and in Communist and advanced industrial societies have challenged some of the most cherished assumptions of social science forcing social scientists to rethink many of the categories of their discipline In a concisely written and provocative book the author traces this process of rethinking He does so by going back to the nineteenth century origins of political sociology and economy and by exploring more recent attempts by American scholarship to fashion from the writings of Smith Marx Spencer Weber and Durkheim a new universal theory of modernization and political change The author argues that these attempts led to a new intellectual crisis which could be resolved only by a paradigm shift that is by refocusing the discipline from the classical concept of social relations to a new global concept of the division of labor and systems of exchange Overall the volume may be read both as an intellectual history of modern political science and as an attempt to fashion an analytical tool for empirical research As such it will be of interest to students of political philosophy as well as of comparative politics

Development and Globalization David F. Ruccio, 2012-12-06 Since the mid 1980s David F Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning Third World development and capitalist globalization The aim of this collection is to show through a series of concrete examples how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies The book consists of fifteen essays plus an introductory

chapter situating the author's work in a larger intellectual and political context. The topics covered range from planning theory to the role of the state in the Nicaraguan Revolution from radical theories of underdevelopment to the Third World debt crisis and from a critical engagement with regulation theory to contemporary discussions of globalization and imperialism.

Reworking Modernity Allan Pred, Michael Watts, 1992 Using both grand conceptualizations and grounded case studies Allan Pred and Michael Watts look at how people cope with and give meaning to capitalism and modernity in different times and places. As capital accumulation has grown and taken new forms it has affected technology and labor relations which in turn have affected people's daily lives. These changes have not always been either welcome or easy. Pred and Watts focus on the symbolic discontent and cultural confrontations that accompany capitalism. They depict people struggling over the meaning of change in their lives and over new relations of power. Modernity is experienced differently in different times and places. To illustrate this point Pred and Watts offer four case studies that range across time and space. These studies remind us that there are multiple capitalisms and multiple reactions to capitalisms. Watts begins with a study of a Muslim millenarian movement that arose alongside the Nigerian oil boom of the 1970s. When a Muslim prophet and disenfranchised followers tried to create a distinctive community and identity they came into brutal conflict with state authorities. Thousands died in the resulting oppression. Watts's next case is less bloody at least in the short run. He tells us what happened when technological change was introduced in rice production in West African peasant society. Peasants were drawn into the world economy as contract farmers. This changed work relations and affected everyday life in peasant households. Families began to fight over who would work and under what conditions. They struggled over gender identity and property rights. We move back in time and across space for their third case study. Pred discusses changes in the daily life of the Stockholm working class at the end of the nineteenth century. He writes of the various forms their discontent took as they struggled with economic restructuring. Even conflict over street names took on special meaning. For the last case Pred takes us to a steel mill in California. When a South Korean company became half owner of the mill there was money for modernization and the threat of layoffs was reduced. But the workers remained unhappy. They protested low wages, unsafe conditions and unfair recruitment practices. Their labor issues turned into issues of nationalism, morality and identity. All four case studies demonstrate the shock of modernity and how the resulting struggles affect daily life.

Population in an Interacting World William Alonso, 1987 Earth's human population inhabits a complex web shaping population movements and patterns of births and deaths. Nine experts explore the nature of the interplay linking rich and poor countries. The demographic experience of each nation occurs in a larger context of social, political, economic, cultural, religious, military and biological forces.

More than Munitions Clare Wightman, 2014-07-30 Clare Wightman explores the key issue of gender in explaining the experience of men and women at work. She uses women's employment in the engineering industries between 1900 and 1950 to confront many of the contentious debates in women's history. She shows that the two World Wars did not

produce radical changes for women at work Throughout the book the author questions the leading role given to gender ideology in constructing the attitudes of employers and suggests that it was only one factor among many which shaped women's experiences in the workplace This is a major study with wide and challenging implications for the subject The State and the Labor Market Samuel Rosenberg, 2012-12-06 In the two decades before the mid 1970s macroeconomic policies in Western Europe were frequently accompanied by policies of direct wage restraint in the pursuit of acceptable levels of employment inflation and international competitiveness The same period witnessed a proliferation of social welfare programs elements of which were sometimes commingled with demand management and pay policies in trilateral bargaining processes involving governments unions and employers In the wake of such subsequent developments as the oil price shocks sharply intensified international competition and slowing of growth rates in productivity however governments resorted more frequently to deflationist macroeconomic policies and also to policies aimed directly at increasing inflexibility in wage determination and the deployment of labor by the firm It is a major theme of this very interesting book that these labor market policies have not been demonstrably or at least sufficiently effective in combating the high rates of unemployment which have been prevalent in most of the countries of Western Europe since the late 1970s This theme emerges from the chapters on labor market developments and policies in six countries of Western Europe the United States and Hungary a welcome addition to this type of scholarship as well as another set of chapters devoted to specific policy areas In effect Samuel Rosenberg and his colleagues an international team of nineteen economists and sociologists are repeating in concrete terms a sermon preached by Keynes over a half century ago *Undocumented Workers' Transitions* Sonia McKay, Eugenia Markova, Anna Paraskevopoulou, 2012-10-02 This book explores how immigration laws while aimed at discouraging undocumented migration actually sustain it It documents the circumstances that have caused previously documented migrants to become undocumented and explores the impact of their changing status on their families and on their own employment opportunities The authors argue that undocumented migrants are forced into the most precarious types of work and changes in the way that employment is organized with a shift into temporary agency and subcontracted work makes undocumented migrants particularly attractive in some employment markets This groundbreaking volume draws substantially on data collected from a two year research study in seven European countries that was focused on understanding the impact of migration flows on EU labour markets *The Age of Dualization* Patrick Emmenegger, 2012-01-17 Poverty increased inequality and social exclusion are back on the political agenda in Western Europe not only as a consequence of the Great Recession of 2008 but also because of a seemingly structural trend towards increased inequality in advanced industrial societies that has persisted since the 1970s How can we explain this increase in inequalities Policies in labor markets social policy and political representation are strongly linked in the creation widening and deepening of insider outsider divides a process known as dualization While it is certainly not the only driver of increasing

inequality the encompassing nature of its development across multiple domains makes dualization one of the most important current trends affecting developed societies However the extent and forms of dualization vary greatly across countries The comparative perspective of this book provides insights into why Nordic countries witness lower levels of insider outsider divides whereas in continental liberal and southern welfare states they are more likely to constitute a core characteristic of the political economy Most importantly the comparisons presented in this book point to the crucial importance of politics and political choice in driving and shaping the social outcomes of deindustrialization While increased structural labor market divides can be found across all countries governments have a strong responsibility in shaping the distributive consequences of these labor market changes Insider outsider divides are not a straightforward consequence of deindustrialization but rather the result of political choice A landmark publication this volume is geared for faculty and graduate students of economics political science social policy and sociology as well as policymakers concerned with increasing inequality in a period of deep economic and social crisis

Invisible Factories Lauren A. Benton, Lauren Benton, 1990-01-01 Invisible Factories analyzes the role of the informal economy in national development and weighs alternative claims about its impact on industrial development Detailed case studies of the electronics and shoe industries in Spain demonstrate the restructuring process Benton examines the transformation of ideas about work and gender the shifting lines of conflict between workers and employers and growing tensions between national and regional interests She shows that these elements of the workplace and national politics rather than the logic of economic development command the new industrial order Benton asks how decentralization of production has affected workers industrial growth and the recasting of industrial policy Explored in depth are the plight of women outworkers the history of regional labor conflicts and the evolution of national level bargaining among unions employers and the state

Modern Italy Paul Furlong, 2003-09-02 Paul Furlong presents an introduction to Italian politics and policy making considering in detail the way in which Italy's recent history has affected its course of political and economic development He looks at the policy process through the 1980s analysing the practical results of the policy making process in key areas such as industry and the economy He goes on to discuss the party political and governmental developments of the 1990s The book is designed throughout to illuminate the Italian case by applying a comparative framework Italy has often been treated as an exception to any rule of Western European politics there are however many features that the country holds in common with its EC neighbours

Shaping Organization Form Gerardine DeSanctis, Janet Fulk, 1999-07-20 Shaping Organization Form considers the role of new communication technologies in shaping organizations today and in the future Four key themes are considered in depth changes in technology changes in organizational form and their mutual influence on one another evolutionary processes in organizations and the ways in which technology can influence these processes the development of organizational communities and inter organizational relationships that are mediated by electronic communication systems and major controversies surrounding electronically

mediated organizations and directions for future research that flow out of these controversies **Information Technology and Organizational Transformation** JoAnne Yates, John Van Maanen, 2001 Assesses information technology and organizational transformation Moves beyond the superficial glorification of information technology as an instrument of social change examining mechanisms of change as they play out in everyday organizational life Chapters are in sections on the history rhetori
