Conserving Americas Neighborhoods:

Conserving America's Neighborhoods Robert Yin, 2013-03-09 Over the years I have conducted numerous neighborhood studies alternately focusing on specific geographic areas public programs and types of citizen actions Because most of these efforts were done on a project by project basis it did not readily occur to me that these separate investigations also represented an aggregate statement about American neighborhoods the continuing and complex relationship between public policy and neighborhood life A suggestion by Lloyd Rodwin the senior editor for this series provided the opportunity to reexamine the various manuscripts and to select and in some cases considerably edit those bearing most on this overall theme Thus each of the chapters in this book is a commentary on the potential uses of public policy for preserving the most cherished aspect of contemporary neighborhoods the social life within them In some cases the policy actions may have only an indirect effect on neighborhoods For instance a whole portion of the book is devoted to the role of research in understanding neighborhood conditions public policy is relevant because research these days has itself become a public policy enterprise In other cases the policy effects are direct and pervasive the support of citizen organizations the delivery of neighborhood services and the provision of timely and relevant information to residents I do not know whether the relationship between public policy and neighborhoods is the same or as intimate outside the United States

Michael J. White, 1988-07-14 Residential patterns are reflections of social structure to ask who lives in which neighborhoods is to explore a sorting out process that is based largely on socioeconomic status ethnicity and life cycle characteristics This benchmark volume uses census data with its uniquely detailed information on small geographic areas to bring into focus the familiar yet often vague concept of neighborhood Michael White examines nearly 6 000 census tracts approximating neighborhoods in twenty one representative metropolitan areas from Atlanta to Salt Lake City Newark to San Diego The availability of statistics spanning several decades and covering a wide range of demographic characteristics including age race occupation income and housing quality makes possible a rich analysis of the evolution and implications of differences among neighborhoods In this complex mosaic White finds patterns and traces them over time showing for example how racial segregation has declined modestly while socioeconomic segregation remains constant and how population diffusion gradually affects neighborhood composition His assessment of our urban settlement system also illuminates the social forces that shape contemporary city life and the troubling policy issues that plague it A Volume in the Russell Sage Foundation Census Series

Heritage Conservation in the United States John H. Sprinkle, Jr., 2023-05-25 Heritage Conservation in the United States begins to trace the growth of the American historic preservation movement over the last 50 years viewed from the context of the civil rights and environmental movements The first generation of the New Preservation 1966 1991 was characterized by the establishment of the bureaucratic structures that continue to shape the practice of heritage

conservation in the United States The National Register of Historic Places began with less than a thousand historic properties and grew to over 50 000 listings Official recognition programs expanded causing sites that would never have been considered as either significant or physically representative in 1966 now being regularly considered as part of a historic preservation planning process The book uses the story of how sites associated with African American history came to be officially recognized and valued and how that process challenged the conventions and criteria that governed American preservation practice This book is designed for the historic preservation community and students engaged in the study of historic preservation
