**Notional Identities** Thomas Christie, 2014-07-18 Notional Identities takes up the challenge of engaging with the popular genres of speculative fiction and crime fiction by Scottish authors from the mid 1970s until the beginning of the twenty first century examining a variety of significant novels from across the decades in the light of wider considerations of ideology genre and national identity The book investigates the extent to which the national political and cultural climate of this tumultuous era informed the narrative form and social commentary of such works and considers the manner in which and the extent to which a specific and identifiably Scottish response to these ideological matters can be identified in popular prose fiction during the period under discussion Although Scottish literary fiction of recent decades has been studied in considerable depth Scottish popular genre literature has received markedly less critical scrutiny in comparison Notional Identities aims to help in redressing this balance examining popular Scottish texts of the stated period in order to reflect upon whether a significant relationship can be discerned between genre fiction and the mainstream of Scottish literary writing and to consider the characteristics of the literary connections which exist between these different modes of writing

*The Melting Point* Kenneth F. McKenzie, 2024-05-28 As the Commander of U S Central Command General Frank McKenzie oversaw some of the most important and controversial operations in modern U S military history He had direct operational responsibility for the strikes on Qassem Soleimani and two successive leaders of ISIS the many months of deterrence operations against Iran and its proxies and the methodical drawdown in Iraq He directed the noncombatant evacuation operation in Afghanistan and our final withdrawal from that tortured country The Melting Point has three themes The first one is the importance of the primacy of civilian control of the military It has become a widely perceived truth that this control has been eroded over the past few years General McKenzie doesn t believe that to be the case and he speaks with some authority on the matter arguing that the civ mil relationship isn t perfect or frictionless but it doesn t have to be and probably shouldn t be It is however more durable than many believe and is supported and embraced by the military to a degree that some critics do not choose to recognize The second theme is the uniqueness of being a combatant commander Combatant commanders participate in the development of policy although as junior partners They are also responsible for the execution of policy once civilian leaders have formulated their decision a unique position and very different than the role of a service chief or even the Chairman of the Joint Chiefs of Staff None of these officers are in the chain of command and they have no ultimate mortal responsibility or authority for execution Only the combatant commander stands astride the boundary of decision making and execution Finally the third theme that McKenzie argues is that leaders matter and the decisions they make have a profound effect on what happens on the battlefield McKenzie provides an honest assessment of his time in

command describing decisions that were sound as well as some outcomes he wishes were different He offers a vivid portrait of leadership in action in one of the most volatile regions of the world
