Constructing White Collar Crime:

Constructing White-Collar Crime Joachim J. Savelsberg, 2016-11-11 Criminal law norms are socially derived being constructed in political processes but only recently has criminological research began to focus on the political construction of criminal law There has been increasing interest in the quality of these political processes the decisions that result and the rationales and social forces guiding these decisions In *Constructing White Collar Crime* Joachim J Savelsberg a sociologist and Peter Brühl a lawyer have provided an interdisciplinary case study of the construction of new German laws against white collar crime relating their results to internationally comparative findings The analysis is empirical it is theoretically grounded in a sociological approach that contrasts Marxist versus pluralist or differentiation theory and functionalist versus conflict group or action theory The authors also analyze their findings in relation to Max Weber's theory of rationalization of law In addition the research is methodologically innovative introducing the technique of cognitive mapping into the study of criminal justice legislation The book represents the authors attempts to bridge the gap between microsociological and macrosociological approaches to the construction of criminal law The authors analyze action rationales communication patterns and power structures as they play out in different stages of the law making process claims making in news media participation of scholars and practitioners in an expert commission and in parliamentary hearings involvement of industrial lobbying groups during the drafting of the bill in the Department of Justice and parliamentary deliberations The analysis demonstrates the considerable weight of economic and political rationales as opposed to justice criteria in the development of criminal legislation It also indicates that white collar crime legislation may have counterproductive consequences The laws are intended to increase the quality of criminal justice by criminalizing the behavior of the powerful but the less powerful groups within the white collar classes are more likely to feel the effects *Constructing White Collar Crime* will be of interest to students and scholars in the areas of sociology law and criminology

The Routledge International Handbook of the Crimes of the Powerful Gregg Barak, 2015-06-05 Across the world most people are well aware of ordinary criminal harms to person and property Often committed by the powerless and poor these individualized crimes are catalogued in the statistics collected annually by the FBI and by similar agencies in other developed nations In contrast the more harmful and systemic forms of injury to person and property committed by powerful and wealthy individuals groups and national states are neither calculated by governmental agencies nor annually reported by the mass media As a result most citizens of the world are unaware of the routinized crimes of the powerful even though they are more likely to experience harms and injuries from these types of organized offenses than they are from the atomized offenses of the powerless Research on the crimes of the powerful brings together several areas of criminological focus involving organizational and institutional networks of powerful people that commit crimes against workers marketplaces taxpayers and political systems as well as acts of torture terrorism and genocide This international handbook offers a comprehensive authoritative and structural

synthesis of these interrelated topics of criminological concern It also explains why the crimes of the powerful are so difficult to control Edited by internationally acclaimed criminologist Gregg Barak this book reflects the state of the art of scholarly research covering all the key areas including corporate global environmental and state crimes The handbook is a perfect resource for students and researchers engaged with explaining and controlling the crimes of the powerful domestically and internationally *The Oxford Handbook of Criminology* Rod Morgan, Mike Maguire, Robert Reiner, 2012-04-12 The approach of the year 2000 has made the study of apocalyptic movements trendy But groups anticipating the end of the world will continue to predict Armageddon even after the calendar clicks to triple Os Constructing Crime Janet Mosher, Joan Brockman, 2010-05-10 Constructing Crime examines the central question Why do we define and enforce particular behaviours as crimes and target particular individuals as criminals To answer this question contributors interrogate notions of crime processes of criminalization and the deployment of the concept of crime in five radically different sites the enforcement of fraud against welfare recipients and physicians the enforcement of laws against Aboriginal harvesting practices the perceptions of incivilities or disorder in public housing projects and the selective criminalization of gambling By demonstrating that how crime is defined and enforced is connected to social location and status these interdisciplinary case studies and an afterword by Marie Andr e Bertrand challenge us to consider just who is rendered criminal and why This timely volume will appeal to policy makers and students and practitioners of law criminology and sociology **The Social Construction of What?** Ian Hacking, 2000-11-15 Lost in the raging debate over the validity of social construction is the question of what precisely is being constructed Facts gender quarks reality Ian Hacking's book explores an array of examples to reveal the deep issues underlying contentious accounts of reality especially regarding the status of the natural sciences The Organisation of Crime and Harm in the Construction Industry Jon Davies, Hanna Malik, 2024-04-30 Drawing on empirical work and secondary analysis from the UK and Finnish construction industries this book contributes a deep rooted analysis of construction industry harms that originate from corporate industrialstate processes The UK context arguably represents a classic neoliberal system categorised by privatisation of services and minimal regulation whereas Finland broadly provides a social democratic alternative with its relatively strong national regulation and public sector oversight of industry These concepts interlink strongly with the notion of state corporate crime since this perspective shifts attention away from individualistic explanations for crime and harm towards symbiosis between states and corporations This book argues that existing explanations based on organised crime and individual rogues are insufficient to account for the wider range and subtlety of harms that occur in construction and therefore offers a unique perspective into organisational industry and state dynamics in this sector An accessible and compelling read this book will appeal to students and scholars of criminology sociology organized crime and those interested in harms in the construction industry *The Oxford Handbook of Offender Decision Making* Wim Bernasco, Jean-Louis Van Gelder, H. Elffers, 2017 The Oxford Handbook of Offender

Decision Making provides high quality reviews of the main paradigms in offender decision making such as rational choice theory and dual process theory It contains up to date reviews of empirical research on decision making in a wide range of decision types including not only criminal initiation and desistance but also choice of locations times targets victims methods as well as a large variety of crimes The Handbook also provides comprehensive in depth treatments of the major methods that can be used to study offender decision making Media, Process, and the Social Construction of Crime Gregg Barak,2013-10-28 First published in 1995 One of the most pervasive forms of social control in our society is the mass media The public learns from television newspapers magazines movies and books what is happening in the world and how to interpret it The problem however is that full or complete interpretations of reality are not presented In short reality itself clear and unadorned is not to be found in the information provided by the media Instead media presentations consist of those various viewpoints that succeed in capturing the minds and imaginations of the masses or in terms of the 1992 presidential campaign that successfully put the winning spin on information Barak and others believe that criminologists should participate in the various media presentations of crime and justice By bringing their knowledge to bear on media presentations criminologists can help make some news more representative and less distorted of the social reality of crime

Corporate Hacking and Technology-driven Crime Thomas J. Holt,Bernadette H. Schell,2010-07-01 This book addresses various aspects of hacking and technology driven crime including the ability to understand computer based threats identify and examine attack dynamics and find solutions Provided by publisher **Cyber Crime: Concepts, Methodologies, Tools and Applications** Management Association, Information Resources,2011-11-30 Threatening the safety of individuals computers and entire networks cyber crime attacks vary in severity and type Studying this continually evolving discipline involves not only understanding different types of attacks which range from identity theft to cyberwarfare but also identifying methods for their prevention Cyber Crime Concepts Methodologies Tools and Applications is a three volume reference that explores all aspects of computer based crime and threats offering solutions and best practices from experts in software development information security and law As cyber crime continues to change and new types of threats emerge research focuses on developing a critical understanding of different types of attacks and how they can best be managed and eliminated *Economic Crisis and Crime* Mathieu Deflem,2011-06-14 Addresses a variety of issues related to economic crisis in the broadest sense of the term involving diverse national and international contexts historical epochs and a range of problems related to economic life This title tackles criminologically relevant questions in connection with crime deviance and or the control thereof **Working Construction** Kris Paap,2018-07-05 Kris Paap worked for nearly three years as a carpenter s apprentice on a variety of jobsites closely observing her colleagues habits expressions and attitudes As a woman in an overwhelmingly male and stereotypically macho profession Paap uses her experiences to reveal the ways that gender class and race interact in the construction industry She shows how the stereotypes of construction workers and their

overt displays of sexism racism physical strength and homophobia are not just how they are but rather culturally and structurally mandated enactments of what it means to be a man and a worker in America The significance of these worker performances is particularly clear in relation to occupational safety when the pressures for demonstrating physical masculinity are combined with a lack of protection from firing workers are forced to ignore safety procedures in order to prove whether male or female that they are man enough to do the job Thus these mandated performances have real and sometimes deadly consequences for individuals the entire working class and the strength of the union movement Paap concludes that machismo separates the white male construction workers from their natural political allies increases their risks on the job plays to management s interests lowers their overall social status and undercuts the effectiveness of their union *Prison Construction Plans and Policy* United States. Congress. House. Committee on the Judiciary,1975

Sociological Theory and Criminological Research Mathieu Deflem,2006-06-21 This volume highlights the value of sociological theorizing in various strands of criminological research and reveals the breadth and depth of criminological sociology in its explicit and informed reliance on insights from sociological theory It offers a range of perspectives and theories of criminal behavior and perspectives of social control *Prison Construction Plans and Policy* United States. Congress. House. Committee on the Judiciary. Subcommittee on Courts, Civil Liberties, and the Administration of Justice,1975 **Race, Gender, and Class in Criminology** Martin D. Schwartz,Dragan Milovanovic,1999 First published in 2000 Routledge is an imprint of Taylor Francis an informa company *Corporate Crime* Miranda A. Galvin,William S. Laufer,2025-08-22 This volume speaks to the fundamental issues inherent in trying to understand the who what where and whys of corporate crime Only in addressing these larger issues does it become possible to begin to integrate the study of corporate crime into the larger criminological theory literature A collection of chapters by experts in the field grapples with three deceptively simple questions When are firms morally and legally responsible agents What are the harms of corporate wrongdoing and who are the victims What theories offer insight to explain corporate wrongdoing In the first section chapter authors wrestle with what it means for a corporation to have agency enough to commit a violation of law as well as what philosophies of punishment might apply when there is no body to jail The second section focuses attention on the often unnamed ambiguous or even ignored victims of corporate crime Many authors in this section take a broad view of victimization speaking to the ways in which the intentional acts of corporations produce negative consequences for individuals and society at large through both the violation of law and the use of corporate power to produce laws that do not problematize corporate behavior The third section turns to issues in corporate offending research including the circumstances that beget offending how corporations may be thought to have life courses and the role of the State in structuring criminal opportunity The editors wrap up the volume by proposing a framework for developing a more comprehensive system of criminal responsibility for corporate actors The chapters in this volume underscore the failures of

the current system and are intended to inspire readers to push for change This important work will be of interest to a wide range of criminologists and has potential to shape the future of corporate crime theory and research It is ideal for use in graduate seminars and upper level undergraduate courses Corporate Compliance and Conformity Petter Gottschalk,2023-03-10 Traditionally control in organizations is concerned with top down approaches where executives attempt to direct their employees attention behaviors and performance to align with the organization s goals and objectives This book takes a new approach by turning the problem of control upside down as it focuses on control of executives who find white collar crime convenient The bottom up approach to executive compliance focuses on organizational measures to make white collar crime less convenient for potential offenders Rather than focusing on the regulatory formalities and staged procedures of compliance and audits the book emphasizes the organizational challenges involved in compliance work when trusted corporate officials exhibit deviant behavior refining and advancing knowledge in this field by reference to contemporary international case studies and associated original evaluative research The themes and cases covered are carefully selected to provide the reader with an insight into professional conduct and procedural practice the organization of corporate compliance success failure and corruption with the theory of convenience placed at the fore It is the bottom up approach by application of convenience theory that makes the proposed book unique compared to other books on corporate compliance This book is a valuable resource for scholars and upper level students researching and studying in the areas of business administration organizational behavior corporate and white collar crime as well as business ethics and auditing

Corporate Compliance Petter Gottschalk,Christopher Hamerton,2022-10-31 Compliance has long been identified by scholars of white collar crime as a key strategic control device in the regulation of corporations and complex organisations Nevertheless this essential process has been largely ignored within criminology as a specific subject for close scrutiny Corporate Compliance Crime Convenience and Control seeks to address this anomaly This initiating book applies the theory of convenience to provide criminological insight into the enduring self regulatory phenomenon of corporate compliance Convenience theory suggests that compliance is challenged when the corporation has a strong financial motive for illegitimate profits ample organisational opportunities to commit and conceal wrongdoing and executive willingness for deviant behaviour Focusing on white collar deviance and crime within corporations the book argues that lack of compliance is recurrently a matter of deviant behaviour by senior executives within organisations who abuse their privileged positions to commission commit and conceal financial crime

Criminology in Canada Theories, Patterns, and Typologies, 8th Edition Larry J. Siegel,Chris McCormick,2023-03-27 Criminology in Canada Eighth Edition is an introductory text that provides a broad overview of the field of criminology It analyzes the most important scholarly works and scientific research reports while presenting topical information on recent cases and events Known to provide the perfect balance between theory and application this text will give students the enthusiasm to further their knowledge of the world of criminology
