Construction Investment Guide for Vietnam, 1995

The Mekong: A Socio-legal Approach to River Basin Development Ben Boer, Philip Hirsch, Fleur Johns, Ben Saul, Natalia Scurrah, 2015-12-22 An international river basin is an ecological system an economic thoroughfare a geographical area a font of life and livelihoods a geopolitical network and often a cultural icon It is also a socio legal phenomenon This book is the first detailed study of an international river basin from a socio legal perspective The Mekong River Basin which sustains approximately 70 million people across Cambodia China Laos Myanmar Thailand and Vietnam provides a prime example of the socio legal complexities of governing a transboundary river and its tributaries The book applies its socio legal analysis to bring a fresh approach to understanding conflicts surrounding water governance in the Mekong River Basin The authors describe the wide range of uses being made of legal doctrine and legal argument in ongoing disputes surrounding hydropower development in the Basin putting to rest lingering caricatures of a single ASEAN way of navigating conflict They call into question some of the common assumptions concerning the relationship between law and development The book also sheds light on important questions concerning the global hybridization or crossover of public and private power and its ramifications for water governance With current debates and looming conflicts over water governance globally and over shared rivers in particular these issues could not be more pressing *Engineers at War (United States Army in Vietnam Series)* Adrian G. Traas, Center of Military History United States Department of the Army, 2018-10 *Engineers at War* describes the role of military engineers especially the U S Army Corps of Engineers in the Vietnam War It is a story of the engineers battle against an elusive and determined enemy in one of the harshest underdeveloped regions of the world Despite these challenges engineer soldiers successfully carried out their combat and construction missions The building effort in South Vietnam allowed the United States to deploy and operate a modern 500 000 man force in a far off region Although the engineers faced huge construction tasks they were always ready to support the combat troops They built ports and depots carved airfields and airstrips out of jungle and mountain plateaus repaired roads and bridges and constructed bases Because of these efforts ground combat troops with their supporting engineers were able to fight the enemy from well established bases Although most of the construction was temporary more durable facilities such as airfields port and depot complexes
