Construction Cost Management:

Building Design Cost Management David Jagger, Andrew Ross, Jim Smith, Peter Love, 2002-08-30 The design and construction of building projects is a complex and demanding process. It involves a variety of disciplines including architecture, quantity surveying, engineering and construction management. The common objective is to deliver on behalf of clients commissioning construction work buildings of the right quality at the right price and within the right time scale. This introductory textbook explains the development, application and pivotal role of design cost management from inception through to completion of a project and considers its context and relevance within current construction procurement arrangements including design and build. The text discusses the need for improvements in communication between all those involved in the process and outlines how to achieve better information management underpinned by information technology to help overcome the criticisms of the industry for too often delivering projects late, over budget and of poor quality. Building Design Cost Management will benefit all those involved in the design and construction of buildings in particular students of architecture, quantity surveying and construction management as it takes an innovative approach to explain the process of design cost management using a practical case study to demonstrate its application, supported by a dedicated website www.bdcm.co.uk which includes on the website selective information from the nationally available Building Cost Information Service to give students a dynamic modelling tool to examine and carry out design cost management.

Construction Cost Management Keith Potts, Nii Ankrah, 2008-04-30 Using a combination of worked examples and case studies, this book examines how projects go over cost, what lessons can be learned from past examples and what approaches have successfully been employed. Example case studies include The Scottish Parliament, Wembley Stadium, Heathrow Terminal 5. If you are studying Surveying or Construction Management or starting out as a Construction Cost Manager and need to plan or assess construction projects, then this is the book for you.

Construction Cost Management Keith Potts, Nii Ankrah, 2014-01-23 In this updated and expanded second edition, Keith Potts and Nii Ankrah examine key issues in construction cost management across the building and civil engineering sectors both in the UK and overseas. Best practice from pre-contract to post-contract phases of the project life cycle are illustrated using major projects such as Heathrow Terminal 5, Crossrail and the London 2012 Olympics as case studies. More worked examples, legal cases, case studies and current research have been introduced to cover every aspect of the cost manager's role. Whole life costing, value management and risk management are also addressed and self-test questions at the end of each chapter support independent learning. This comprehensive book is essential reading for students on surveying and construction management programmes as well as built environment practitioners with cost or project management responsibilities.

Cost Management of Construction Projects Donald Towey, 2013-06-12 The cost manager/quantity surveyor plays a pivotal role in the financial and contract management of construction projects, although the exact nature of the service they provide depends on the project employer's terms of engagement. This can mean acting as

consultant in a range of roles including cost and advisory services for budget setting to initiate a project cost management through the design and construction phases contract administration and acting as the client side project manager to oversee the entire building process Cost Management of Construction Projects focusses on the cost manager quantity surveyor engaged by the project client and discusses key elements that help drive project success including measurement based on the New Rules of Measurement published by RICS procurement cost planning contract administration and project cost management With examples it provides a thorough guide to the role in the workplace and in the field directly addressing the day to day situations faced by the cost manager quantity surveyor Donald Towey MRICS has extensive experience of the construction industry His experience began as an estimator with a glass glazing contractor in Manchester Following a number of positions with UK contractors he relocated to Australia and has worked with a number of developers and main contractors as well as doing freelance work He is currently working in contracts management in Sydney
