Construction Materials For Achitecture:

Materials for Architects and Builders Arthur R. Lyons, 2007 *Materials for Architects and Builders* provides an introduction to a wide range of building materials. It explains in detail the manufacture, key physical properties, specification and uses of the standard building products everything a student would need to know. The book also describes many recent technological innovations and rediscovered materials reflecting an increased concern for environmental issues within the Industry. This new edition has been completely updated to reflect the amended Building Regulations, the latest British and European Standards as well as incorporating current advice and information from the Building Research Establishment. Dr Arthur Lyons is a teacher fellow and principal lecturer in building materials at the Leicester School of Architecture within the Faculty of Art and Design at De Montfort University UK. He has taught the subject of building materials for thirty five years to a wide range of students within the built environment disciplines. The text covers the widest range of materials from standard products to ecofriendly materials and components. Up to date with respect to the latest Building Regulations and European British Standards. Well illustrated with many colour images showing typical use of the materials in high quality construction.

Materials for Architects and Builders Arthur R. Lyons, 1997. Throughout the book is clearly illustrated with many photographs and diagrams showing materials and building components both individually and in use. Where relevant the environmental aspects of the building materials are considered. Each chapter lists the up to date British and European Standards together with related Building Research Establishment publications and suggested further reading. A selection of colour images illustrates the appropriate use of different construction materials within the context of quality architectural design. Essential reading for students of building architecture and construction. Extensive coverage of all types of building materials. Key introductory text. **Construction Materials for Architects and Designers** Terry L. Patterson, 1990.

Materials for Architects and Builders Arthur R. Lyons, 2004. This new edition has been fully updated to take into account new materials that have come into use since the first edition.
