The Economics and Sociology of Management Consulting Thomas Armbrüster, 2006-11-16 academic disciplines Book Jacket

Fearless Consulting Erik de Haan, 2006-06-14 The history of consulting dates back to the original intervention of the serpent in the Garden of Eden and today's consultants have just as dubious a reputation They are tempted by flattery and over assessment of their abilities and run the risks of uncertainty responsibility without authority and loss of control In order to steer a middle course they must understand their own intention as consultants Fearless Consulting clearly demonstrates that in spite of the many risks and temptations consultants can approach their profession and clients fearlessly and offers a range of philosophical inspirations for readers as well as specific intervention models and practical methodologies

Demons in the USA Michael E. Heyes, 2024-09-24 Demons in the USA argues that the discourse on the demonic that developed in the nineteenth century continues to exert a powerful hold over the American spiritual imagination The book begins by tracing the conservative Christian encounter with Spiritualism in the nineteenth century and the mode of thinking about the demonic which developed

As Spiritualism's core principles reappeared in the New Age Christian interlocutors once more drew on this anti Spiritualist paradigm to condemn the movement This condemnation is absorbed by and amplified through the film *The Exorcist* The author considers how the success of the film disseminates the anti Spiritualist paradigm in surprising ways entangling it with entertainment science and politics such that it influences psychology the Satanic Panic of the 1980s and the contemporary QAnon movement This entanglement points to the broader argument of the work While we may wish to think of a film as entertainment and thus having no bearing on reality or demonic material as religious and thus exempt from categories like politics or science the truth is that categories are not so easily separated The author contends that the need to enforce the boundaries of such categories and the failure to do so is a hallmark of the intellectual construct of modernity and that those who believe in demons in the contemporary United States are surprisingly modern in their views The book grounds the importance of media to the twentieth and twenty first century religious experience arguing that the United States of today would not be possible without *The Exorcist* and its products *Demons in the USA* will be of particular interest to scholars dealing with religion in America those with a focus on religion and film or those involved with contemporary demonology

Ann Brooks, Kathy Edwards, 2013-11-07 The traditional model of consulting places an emphasis on diagnosing a problem and finding a cure But in today's business world of globalized organizations rapid knowledge proliferation and the intertwining of economies that approach is becoming less and less viable problems are quickly redefined new knowledge and ownership of that knowledge is constantly surfacing and being challenged and no solution is a permanent solution Consulting in Uncertainty articulates a model of consulting that addresses the uncertainty and interconnectedness of the world in a post industrial knowledge era Emphasizing outcomes and inquiry over diagnosis Brooks and Edwards outline this new consulting model as well as the skills consultants must bring to the table in any uncertain and dynamic environment Integrating practical knowledge with scholarship this book covers skills such as Relational skills and the consulting relationship Cultural awareness and related skills Contextual analysis Facilitating inquiry Collecting and efficiently analyzing data or information Consultants and students of consulting as well as managers teachers counselors and even parents will find this book enlightening and useful in navigating today's uncertain world

The Knowledge Creation Potential of Management Consulting

Francesco Ciampi, 2008 The Knowledge Creation Potential of Management Consulting interprets management consulting from a knowledge perspective and proposes a general conceptual framework for investigating and interpreting that potential To begin with the main dynamics of change that characterize today's demand for management consulting is outlined and it is suggested that firms are becoming increasingly aware of the real cognitive rather than only the economic value generation potential that can be activated through the consulting relationship Also the possible pathways for evolutionary transformation of consulting practices models and roles that consulting firms could follow if they want to take advantage of the important changes that are taking place are looked at Next a definition of management consulting is proposed which aims to identify the distinctive ontological real essential and relatively stable features of this particular service and emphasizes the mainly cognitive nature of its value creation potential Furthermore two approaches to interpreting management consulting are discussed the diachronic approach and the synchronic approach To conclude the

theories interpreting knowledge creation processes as knowledge conversion processes are explained and applied to the specific context of management consulting relationships *The Emotional Organization* Stephen Fineman, 2009-02-09 This landmark collection is exclusively devoted to demonstrating mapping what is understood today about the power and structural effects of emotion and identity in organizations Essays at the leading edge of research reveal the influence of workplace cultures power and institutional expectations while also exploring the negative impacts of emotion management in the workplace Brings together an international group of cutting edge researchers to write critically about emotion in different organizational and cultural settings Includes research on policy change management and professional practice Exposes the influence of workplace cultures power and institutional expectations on emotion Reveals the darker and oppressive features of emotion management in organizations Applies recent critical organizational theory to emotion The Firm Duff McDonald, 2014-09-30 Star financial journalist Duff McDonald uncovers how the managing consulting firm of McKinsey Company and its high powered high priced business savants have ushered in waves of structural financial and technological shifts to the biggest and best American organizations revealing a list of world shaping successes and striking failures **What's Wrong With Management and How to Get It Right** Tony Manning, 2015-08-05 In today's rapidly changing and increasingly complex world companies everywhere struggle to meet new challenges and continue to underperform and despite churning out a constant stream of theories and tools the management ideas industry has made little progress in advancing management thought In his latest book top strategy consultant Tony Manning brings managers the insights and advice they need for the coming decades of turbulence and hyper competition Drawing lessons from 100 years of management history plus his own extensive research and experience he shows how management's frenetic quest for silver bullets has led to confusion and complexity rather than clarity and simplicity And he identifies eight critical strategy practices that apply to every company everywhere and explains how to use them This fascinating and practical guide is a must read for anyone interested in improving business results **A Jewish Guide to the Mysterious** Rabbi Pinchas Taylor, 2020-06-15 Modern science is the most accurate lens of reality that humanity has developed so far Science is crucial to humanity's health safety and development Still the lens of science only sees a thin slice of the totality of existence Much of the human experience cannot be simply explained by standard quantifiable tests Many people have become aware of the limits and shortcomings of scientific knowledge and have also realized that our perpetual hunger for spiritual understanding is real and undeniable Many of us sense that there is something beyond Throughout various periods of history and various cultures and societies people have been interested in the mysterious and the paranormal This yearning is rooted in the soul's search for true spirituality A Jewish Guide to the Mysterious written by one of contemporary Judaism's leading scholars and teachers clearly explains classic Torah views on intriguing phenomena such as dreams astrology time travel alien life reincarnation ESP and auras angels demons ghosts and even such topics as the lost city of Atlantis and the Bermuda Triangle

Read this fascinating book and be amazed **Marriage Advice for a Pope** Patrick Nold,2008-11-30 The Medieval Church taught that marriage was indissoluble and that consent was the key Why then could a marriage be dissolved by one spouse joining a religious order after an exchange of consent but before consummation This question vexed Thirteenth century academics and in the fourteenth century Pope John XXII asked a group of leading theologians and lawyers to study the issue Position papers were produced to explain the exception to the rule of indissolubility for chaste monks and nuns and to explore whether the pope had the power to extend it to celibate priests and deacons These texts edited here were used by John XXII to draft his bull Antiquae Concertationi 1322 This study reconstructs the story behind the constitution providing a unique insight into the decision making process at the Roman curia in Avignon under a controversial pope **Research Methods in Management** Geoff Lancaster,2007-06-01 Written specifically for the Research Methods aspect of an MBA course Research Methods in Management is the ideal companion for those needing guidance on carrying out a research project The author offers a succinct guide to the topic which provides MBA and Business Students with the necessary grounding in the area of research without going into too much depth The text is therefore written with modular courses in mind so that students gain an overall perspective of the important areas that need consideration and can ascertain the key points they need to be aware of when carrying out research Dissertations and projects form an integral part of many MBA and degree courses and therefore guides such as this are becoming invaluable when tackling this area for the first time Research Methods in Management approaches the research task in a step by step manner covering areas such as data collection observational methods and data analysis Guidance is provided on the best way to approach aspects of the research process and to ensure all aspects are adequately covered As this is an area where many students feel they do not have any experience a text such as this provides the necessary support in approaching this area of the course *The Management Idea Factory* Stefan Heusinkveld,2013-11-26 Although there has traditionally been considerable field level attention on how consultants market their ideas and practices there is still a lack of research that discusses the earlier intra organizational phases in the development process While the present literature provides important insights that enhance our understanding of consulting the consultancy industry and the way that consultants present their ideas and services on the market for management solutions we know relatively little about the way knowledge based innovations develop within consultancy firms and the mechanisms that shape the intra organizational evolution of these ideas and practices This book seeks to address this gap by revealing how the development of new ideas and practices takes shape in consultancies The work addresses questions such as In which way do consultancies sense the contemporary market needs How do new ideas and practices become established within a consultancy How do consultancies seek to maintain their repertoire And what role do these new ideas and practices play in their assignments To provide more insight into these different aspects of knowledge based innovation in consultancies the book draws on and integrates literature from diverse relevant fields such as product innovation and market

orientation but also uses institutional and practice based perspectives The research presented in this book can be seen in the light of emerging research into knowledge based innovation and new concept development that concentrate on empirically studying how knowledge entrepreneurs seek to develop commercially viable ideas and practices that have the potential to have a significant impact on management and organizational praxis **Management Consultancy** Joe
