Historical Archaeology Pedro Paulo A. Funari,Martin Hall,Sian Jones,2013-03-07 Historical Archaeology demonstrates the potential of adopting a flexible encompassing definition of historical archaeology which

involves the study of all societies with documentary evidence It encourages research that goes beyond the boundaries between prehistory and history Ranging in subject matter from Roman Britain and Classical Greece to colonial Africa Brazil and the United States the contributors present a much broader range of perspectives than is currently the trend

Encyclopedia of Historical Archaeology Charles E. Orser Jnr, 2002-09-11 The Encyclopedia of Historical Archaeology is a ground breaking compendium of information about this ever growing field Concentrating on the post 1400 period as well as containing generic explanations of historical archaeology where needed the encyclopedia is compiled by over 120 experts from around the world and contains more than 370 entries covering important concepts and sites **A Historical**

Archaeology of Delaware Lu Ann De Cunzo, 2004 By analyzing what she describes as richly detailed archaeological site biographies De Cunzo reconstructs how Delaware s farming people actively created their identities and shaped their interactions at home at work at church and in the marketplace as they began to confront industrial capitalism Informed by a contextual interpretive perspective this valuable work reveals the complex interrelationships among environment technology economy social order and cultural praxis that defined the cultures of agriculture in Delaware during the last three centuries Jacket **International Handbook of Historical Archaeology** Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today Historical Archaeology Through a Western Lens Mark S. Warner, Margaret Sermons Purser, 2017 A 2017

Choice Outstanding Academic Title The mythic American West with its perilous frontiers big skies and vast resources is frequently perceived as unchanging and timeless The work of many western based historical archaeologists over the past decade however has revealed narratives that often sharply challenge that timelessness Historical Archaeology Through a Western Lens reveals an archaeological past that is distinct to the region but not in ways that popular imagination might suggest Instead this volume highlights a western past characterized by rapid and ever changing interactions between diverse groups of people across a wide range of environmental and economic situations The dynamic and unpredictable lives of western communities have prompted a constant challenging and reimagining of both individual identities and collective understandings of their position within a broader national experience Indeed the archaeological West is one clearly characterized by mobility rather than stasis The archaeologies presented in this volume explore the impact of that pervasive human mobility on the West a world of transience impermanence seasonal migration and accelerated trade and technology at scales ranging from the local to the global By documenting the challenges of both local community building and global networking they provide an archaeology of the West that is ultimately from the West

Orser, Jr., 2016-08-05 This book provides a short readable introduction to historical archaeology which focuses on modern history in all its fascinating regional cultural and ethnic diversity Accessibly covering key methods and concepts including fundamental theories and principles the history of the field and basic definitions Historical Archaeology also includes a practical look at career prospects for interested readers Orser discusses central topics of archaeological research such as time and space survey and excavation methods and analytical techniques encouraging readers to consider the possible meanings of artifacts Drawing on the author's extensive experience as an historical archaeologist the book's perspective ranges from the local to the global in order to demonstrate the real importance of this subject to our understanding of the world in which we live today The third edition of this popular textbook has been significantly revised and expanded to reflect recent developments and discoveries in this exciting area of study Each chapter includes updated case studies which demonstrate the research conducted by professional historical archaeologists With its engaging approach to the subject Historical Archaeology continues to be an ideal resource for readers who wish to be introduced to this rapidly expanding global field

The Cambridge Companion to Historical Archaeology Dan Hicks, Mary C. Beaudry, 2006-10-26 The Cambridge Companion to Historical Archaeology provides an overview of the international field of historical archaeology c AD 1500 to the present through seventeen specially commissioned essays from leading researchers in the field The volume explores key themes in historical archaeology including documentary archaeology the writing of historical archaeology colonialism capitalism industrial archaeology maritime archaeology cultural resource management and urban archaeology Three special sections explore the distinctive contributions of material culture studies landscape archaeology and the archaeology of buildings and the household Drawing on case studies from North America Europe Australasia Africa and

around the world the volume captures the breadth and diversity of contemporary historical archaeology considers archaeology's relationship with history cultural anthropology and other periods of archaeological study and provides clear introductions to alternative conceptions of the field This book is essential reading for anyone studying or researching the material remains of the recent past Case Studies in Environmental Archaeology Elizabeth Reitz, C. Margaret Scarry, Sylvia J. Scudder, 2008 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods Each chapter is an original or revised work by an internationally recognized scientist This second edition is based on the 1996 book of the same title The editors have invited back a number of contributors from the first edition to revise and update their chapter New studies are included in order to cover recent developments in the field or additional pertinent topics A Historical Archaeology of the Modern World Charles E. Orser Jr., 2013-06-29 This unique book offers a theoretical framework for historical archaeology that explicitly relies on network theory Charles E Orser Jr demonstrates the need to examine the impact of colonialism Eurocentrism capitalism and modernity on all archaeological sites inhabited after 1492 and shows how these large scale forces create a link among all the sites Orser investigates the connections between a seventeenth century runaway slave kingdom in Palmares Brazil and an early nineteenth century peasant village in central Ireland Studying artifacts landscapes and social inequalities in these two vastly different cultures the author explores how the archaeology of fugitive Brazilian slaves and poor Irish farmers illustrates his theoretical concepts His research underscores how network theory is largely unknown in historical archaeology and how few historical archaeologists apply a global perspective in their studies A Historical Archaeology of the Modern World features data and illustrations from two previously unknown sites and includes such intriguing findings as the provenance of ancient Brazilian smoking pipes that will be new to historical archaeologists **Race and Practice in Archaeological Interpretation** Charles E. Orser, Jr., 2013-04-19 Scholars who investigate race a label based upon real or perceived physical differences realize that they face a formidable task The concept has been contested and condoned debated and denied throughout modern history Presented with the full understanding of the complexity of the issue Race and Practice in Archaeological Interpretation concentrates on the archaeological analysis of race and how race is determined in the archaeological record Most archaeologists even those dealing with recent history have usually avoided the subject of race yet Charles E Orser Jr contends that its study and its implications are extremely important for the science of archaeology Drawing upon his considerable experience as an archaeologist and using a combination of practice theory as interpreted by Pierre Bourdieu and spatial theory as presented by Henri Lefebvre Orser argues for an explicit archaeology of race and its interpretation The author reviews past archaeological usages of race including a case study from early nineteenth century Ireland and explores the way race was used to form ideas about the Mound Builders the Celts and Atlantis He concludes with

a proposal that historical archaeology cast as modern world archaeology should take the lead in the archaeological analysis of race because its purview is the recent past that period during which our conceptions of race developed
