Carpenter,David H. Lyon,Terry A. Hasdell,2012-12-06 Sensory testing has been in existence ever since man started to use his senses to judge the quality and safety of drinking water and foodstuffs With the onset of trading there were several developments that led to more formalized testing involving professional tasters and grading systems Many of these grading systems are still in existence today and continue to serve a useful purpose for example in assessing tea coffee and wines However there has also been a growing need for methods for well repli cated objective unbiased sensory assessment which can be applied rou tinely across a wide range of foods Sensory analysis seeks to satisfy this need Sensory analysis is not new to the food industry but its application as a basic tool in food product development and quality control has not always been given the recognition and acceptance it deserves This we believe is largely due to the lack of understanding about what sensory analysis can offer in product research development and marketing and a fear that the discipline is too scientific to be practical To some extent sensory scien tists have perpetuated this fear by failing to recognize the industrial con straints to implementing sensory testing procedures These Guidelines are an attempt to redress the balance **New Food Product**

Development Gordon W. Fuller,1994-02-23 This book provides an objective overview of the hectic often chaotic and frequently unpredictable new food product development process The stages of development are described from the vantage points of the technologist marketer and senior management by an author who has worn all three hats The book covers the various stages of product development including generating and sifting ideas against the company s objectives the consumers perceived needs and expectations the competitiveness of the marketplace the technologist s ability to create and manufacture a safe product within budget and test marketing Problems facing both small and large companies are confronted and solutions are proposed Test marketing and the evaluation of such tests are discussed with some new suggestions for interpreting the criteria used A chapter on organization presents ideas for fostering creativity and avoiding communication and personality conflicts Trends in new ingredients and technologies to assist in the design of new products are given full coverage The last chapter is devoted to the future with stimulating discussion of new challenges to current trends in the industry **Developing New Food Products for a Changing Marketplace** Aaron L.
