Emerging Technologies In Sustainable Innovation, Management and Development R. Udaya Kumar, 2025-10-13

ICETSIMD 2025 was conceived as a vital platform for academicians, researchers and industry leaders. Its primary purpose was to explore the transformative potential of emerging technologies in driving sustainable development. To ensure the high quality, originality and relevance of the contributions, all submissions to the ICETSIMD 2025 conference underwent a rigorous double-blind peer review process. We received 300 manuscript submissions from which 100 were selected for inclusion in the conference proceedings. Each manuscript was evaluated by at least two independent experts based on criteria including scientific rigor, methodological soundness, clarity and contribution to the conference themes.

Consumer Behaviour And Branding: Concepts, Readings And Cases-The Indian Context S. Ramesh Kumar, 2009-09

India is one of the emerging markets that pose a unique set of challenges to marketers. The importance of the context and the usefulness of concepts in the Indian context is the core proposition of the book. The diversity of a mix of factors such as cultural aspects, lifestyles, demographics and unbranded offerings make consumer behaviour a fascinating study. This book focuses on the behavioural principles of marketing and its application to branding in the Indian context. Consumer behaviour concepts associated with branding. A combination of recent and traditional examples reflecting the application of behavioural concepts. Touch of reality boxes to indicate context-based examples. Caselets and cases drawn from real-life situations. Research findings associated with the Indian context. Topical issues in consumer behaviour like cultural aspects, digital marketing and experiential branding.

History of the Electric Automobile Ernest Henry Wakefield, 1993-08-01

History of the Electric Automobile covers the evolution from the first electric vehicles of the 1880s to the advances of today. Beginning with early electric vehicle development in England, France and the United States, this book provides an in-depth look at the so-called golden age of electric vehicles, 1895-1905, demonstrating the technological improvements and business risks of this era. This history also explores the dead period of the 1930s, 1940s and 1950s and the subsequent re-birth of interest in electric vehicles in the early 1960s. Events which have impacted the development of electric cars since then, most notably the Electric Vehicle Act of 1976, are also examined. The book also features an appendix section containing such information as a name table of American electric cars, the Electric Vehicle Act of 1976, nostalgia and more. A glossary and index are also included. For more than a century, nearly all seers who have predicted the role of electric vehicles in personal transportation have been wrong. This book records what actually happened.
