the greatest being to lack the knowledge required to select the correct allergens and to interpret the results The introduction nearly 20 years ago of the journal Contact Dermatitis greatly stimulated the reporting of the clinical side of contact dermatitis but a vast amount of laboratory work has also been published in other journals on the mechanisms and theory of these reactions The literature on the subject is now quite vast and a comprehensive book on the clinical and research aspects of contact dermatitis has been sorely needed This textbook was carefully planned to gather together what is known of the subject into a cohesive whole and it has succeeded admirably It consists of 22 chapters written by 41 contributors each selected for their special study of particular subjects Every feature of contact dermatitis has been covered beginning with its history and even concluding with the names and addresses of those worldwide who have a specific interest in the subject The text is illustrated and well laid out it has been broken up into clearly demarcated sections making it easy to read and its information readily accessible One's own writing concentrates the mind but editing the texts of authors from so many different countries was a task of considerable proportions

Gdynia Poland 2 The Baltic Sea with 366 000 km² is only 0.1% of the world's oceans but nevertheless unique in many ways. The Baltic Sea is the largest area of brackish water in the world. As a formation of nature it is a sea that in many ways resembles a lake. This makes its flora and fauna interesting and well adapted to the brackish water environment. The recent stage of biocoenosis composition is influenced by several features. Historically during the last glaciation when the Baltic was sometimes a huge marine bay and sometimes a large freshwater lake several ecosystems developed and were successively replaced. The flora and fauna composition of those previous biocoenosis was discovered from the geological layers corresponding to the Yoldic Sea, the Ancylus Lake and the Littorina Sea periods. Recently the marine influence has come from the North Sea water inflow which greatly affects the salinity of the deep water. The freshwater influence comes from the fluvial water which gives the surface layer a lower salinity value. Salinity in the Baltic regions varies greatly. Gulf of Bothnia 2.4‰, the central Baltic proper 7.13‰, the Kattegat 15.300‰ in the surface water and 32.34‰ in the bottom water, the Skagerrak 20.300‰ in the surface and 32.35‰ in the bottom water.

DERMATOTOXICOLOGY 4ED Francis Nicholas Marzulli, Howard I. Maibach, 1991-06-01. A guide to the field of dermatotoxicology. This edition includes fundamental information on the mechanisms of action of toxic substances on skin as well as practical information on the varied responses of skin to specific toxic substances and approaches to evaluating dermal toxicity. Other topics discussed include hostile natural elements such as ultraviolet radiation, poisonous plants, man-made detergents and chemicals, problems associated with chronic occupational skin exposure to toxic chemicals, animal alternative research programmes, carcinogenic and Photo Carcinogenic Potential Of Xenobiotic Chemicals, Oculotoxicity, Risk assessment and management and cosmetic safety. Anatomical factors affecting barrier functions, lipids of the permeability barrier, the skin immune system.

Food Additives, Second Edition Revised And Expanded, Nickel and the Skin Howard I. Maibach, Torkil Menne, 1989-04-30. This publication serves as a guide to medical doctors and dentists in the evaluation and management of problems related to nickel allergy. The chemistry, analysis and monitoring of nickel is explored. Recent advances in the immunology of nickel are discussed. Additionally sensitization assays for both humans and animals are presented. The clinical genetic and epidemiologic aspects of nickel sensitization and nickel dermatitis are explained. Social and demographic aspects of nickel contact allergy are discussed as well as the topic of the nickel dermatitis as a preventable health problem.
