Contagion Of War:

Contagion and War John A. Vasquez, 2018-11-22 John A Vasquez explains the processes that cause the spread of interstate war by looking at how contagion worked to bring countries into the First World War Analysing all the key states that declared war the book is comprised of three parts Part I lays out six models of contagion alliances contiguity territorial rivalry opportunity brute force and economic dependence Part II then analyses in detail the decision making of every state that entered the war from Austria Hungary in 1914 to the United States and Greece in 1917 Part III has two chapters the first considers the neutral countries and the second concludes the book with an overarching theoretical analysis including major lessons of the war and new hypotheses about contagion This book will be of great interest to students and scholars of international relations conflict studies and international history especially those interested in the spread of conflict or the First World War

A Contagion of War Terrence Maitland, Peter McInerney, 1983 Photographs maps and eyewitness accounts describe the War in Vietnam

Contagion of War Terrence Maitland, 1983 Handbook of War Studies II Manus I. Midlarsky, 2000 Essays reflecting the most recent theoretically and empirically oriented research on international warfare

Are U.S. Military Interventions Contagious Over Time? Jennifer Kavanagh, 2013-05-09 Current DoD force planning processes assume that U S military interventions are serially independent over time This report challenges this assumption arguing that interventions occur in temporally dependent clusters in which the likelihood of an intervention depends on interventions in the recent past Integrating the concept of temporal dependence into DoD planning processes could help planners develop more appropriate force estimates

The War Puzzle John A. Vasquez, 1993-05-06 This book constructs a new scientific explanation of the onset and expansion of war and the conditions of peace The author describes systematically those factors common to wars between equal states to see if there is a pattern that suggests why war occurs and how it might be avoided or mitigated delineating the typical path by which relatively equal states have become embroiled in wars with one another in the modern global system Emphasis is placed on the issues that give rise to war and how the practices of power politics lead to a series of steps that produce war rather than peace The book differs from others in that it employs the large number of empirical findings generated in the last twenty five years as the basis of its theorizing and integrates these research findings so as to advance dramatically the scientific knowledge of war and peace

War in the Modern Great Power System Jack S. Levy, 2021-09-15 The apparently accelerating arms race between the United States and the Soviet Union and the precarious political conditions existing in many parts of the world have given rise to new anxiety about the possibility of military confrontation between the superpowers Despite the fateful nature of the risk we have little knowledge as Jack S Levy has pointed out of the conditions processes and events which might combine to generate such a calamity No empirically confirmed theory of the causes of war exists and the hypotheses often contradictory that have been proposed remain untested As a step toward the formulation of a theory of the causes of war that can be tested against historical

experience Levy has developed a unique data base that will serve as an invaluable resource for students of international conflict in coming years War in the Modern Great Power System provides a much needed perspective on the major wars of the past In this thorough and systematic study Levy carefully defines the Great Power concept and identifies the Great Powers and their international wars since the late fifteenth century The resulting compilation of war data is unique because of its five century span and its focus on a well defined set of Great Powers Turning to a quantitative analysis of the characteristics patterns and trends in war Levy demonstrates that although wars between the Great Powers have become increasingly serious in every respect but duration over the last five hundred years their frequency has diminished He rejects the popular view that the twentieth century has been the most warlike on record and he demonstrates that it instead constitutes a return to the historical norm after the exceptionally peaceful nineteenth century Applying his data to the question whether war is contagious he finds that the likelihood of war is indeed highest when another war is under way but that this contagious effect disappears after the first war is over Contrary to the popular war weariness theory he finds no evidence that war generates an aversion to subsequent war This study extending the scientific analysis of war back over five centuries of international history constitutes a major contribution to our knowledge of international conflict

The War Puzzle Revisited John A. Vasquez, 2009-07-23 A scientific explanation of the onset and expansion of war and the conditions of peace

Contagion Alison Bashford, Claire Hooker, 2002-11-01 In the age of HIV antibiotic resistant bacteria the Ebola Virus and BSE metaphors and experience of contagion are a central concern of government biomedicine and popular culture Contagion explores cultural responses of infectious diseases and their biomedical management over the nineteenth and twentieth centuries It also investigates the use of contagion as a concept in postmodern reconceptualisations of embodied subjectivity The essays are written from within the fields of cultural studies biomedical history and critical sociology The contributors examine the geographies policies and identities which have been produced in the massive social effort to contain diseases They explore both social responses to infectious diseases in the past and contemporary theoretical and biomedical sites for the study of contagion

Nations at War Daniel S. Geller, J. David Singer, 1998-02-13 Nations at War provides an explanation of war in international politics grounded on data based empirical research The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system Because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume In addition case analyses of two wars the Iran Iraq War 1980 and World War I 1914 are provided as demonstrations of scientifically based explanations of historical events The primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies

Contagion in Prussia, 1831 Richard S. Ross

III,2015-09-18 In 1831 Prussia was consumed by two fears the possibility of revolution resulting from the 1830 November Uprising of Poland against Russia and a looming cholera epidemic As the contagion made its way across Russia Prussian medical officials took note and prepared to respond to what they thought was a highly contagious disease When it spread to Poland Prussia instituted a strict quarantine policy on its border inhibiting Prussian support of the Russian war effort in Poland From the Polish perspective the quarantine was seen as a deliberate act of sabotage against the revolution an attempt to cut off trade with the West This book examines the Prussian government's strict health policy and its consequences including social unrest and resulting public health reforms Polish public health policy is investigated in light of the revolutionary government's needs Information is provided on the cholera camps established by Prussia to quarantine Polish soldiers who crossed the border as refugees in July 1831 the height of the cholera fear in Prussia Contagious Priscilla Wald,2008-01-09 Shows how narratives of contagion structure communities of belonging and how the lessons of these narratives are incorporated into sociological theories of cultural transmission and community formation Schmidt's Jahrbuecher ,1867 **Understanding Civil War: Africa** Paul Collier,Nicholas Sambanis,2005 This publication is part of a two volume set which builds upon previous World Bank research into the causes and characteristics of civil war onset particularly the model developed by Paul Collier and Anke Hoeffler regarding the relationship between violent political conflict and economic development This volume considers the variables identified in the Collier Hoeffler model and applies them to a set of case studies from a range of African countries and then goes on to trace the process of conflict escalation in order to draw conclusions as to why civil war is likely to occur The publication seeks to advance theoretical and empirical knowledge of civil war in order to help further the objective of developing appropriate policy interventions Another volume with case studies from a range of non African countries is available separately ISBN 0821360493 The Internationalization of Communal Strife (Routledge Revivals) Manus I. Midlarsky,2014-06-03 First published in 1992 this edited collection argues that conflicts have a growing tendency both to intensify and to lengthen thus increasing the likelihood of external actors being drawn into the on going violence Here leading experts in comparative and international politics examine this tendency of communal conflicts to spill over into the international arena They also look at the conditions under which these processes do not occur and are mediated successfully The authors combine theoretical perspectives with case studies covering examples from the origins of the First World War to state building in Iraq and whether it was a precursor of the Iran Iraq War and the Gulf Crisis They present both a global overview and a focus on the state as the single most important intermediary in the internationalization process A comprehensive and relevant reissue this volume will appeal to students and scholars of International Relations Comparative Politics and Strategic Studies A Contagion of War Terrence Maitland,Peter McInerney,Boston Publishing Company,1983-01-01 **The Drug Wars in America, 1940-1973** Kathleen Frydl,2013-04-30 Examines how and why the US government went from regulating illicit drug traffic and consumption to
