Contemporary Architecture And Interiors Of The 1950s:

Contemporary Lesley Jackson, 2000 This book provides a full definition and examination of the Contemporary style that was to dominate architecture and design throughout the 1950s. It shows the ways in which these new ideas pervaded all aspects of the market from handcrafted one-offs to the mass-produced industrial item and all areas of design from home decoration to public buildings. Far more than a collection of fifties nostalgia, this volume provides an entertaining and revealing survey of trends in taste and interior design at a time of economic regeneration and social renewal. It shows how the positive spirit of the age was reflected in the buoyant and confident creative expression of its buildings and domestic furnishings.

Contemporary Lesley Jackson, 1994-12 Contemporary Lesley Jackson, 1998-05-03 An exploration of the style that dominated 1950s architecture and design. This book is the first to explore fully the so-called contemporary style that dominated architecture and design from the late 1940s to the end of the 1950s. It was an era of optimism and confidence where new ideas in architecture and design flourished alongside the emergent consumer culture. Emanating mainly from the USA, the contemporary style was fresh and liberating, manifesting itself in the picture window and the open plan in new forms of furniture from Scandinavia and stylish light fittings from Italy and most tellingly in the contemporary kitchen with its fitted units and mod-con appliances. This book examines the fresh and liberated design ideas of this buoyant era with an acute eye and open mind.

Playboy and the Making of the Good Life in Modern America Elizabeth Fraterrigo, 2009-11-05 Launched by Hugh Hefner in 1953, Playboy promoted an image of the young affluent single male, the man about town, ensconced in a plush bachelor pad in constant pursuit of female companionship and a good time. Spectacularly successful, this high-gloss portrait of glamorous living and sexual adventure would eventually draw some one million readers each month. Exploring the world created in the pages of America's most widely read and influential men's magazine, Elizabeth Fraterrigo sets Playboy's history in the context of a society in transition. Sexual mores, gender roles, family life, notions of consumption and national purpose all were in flux as Americans adjusted to the prosperity that followed World War II. Initially, Playboy promised only entertainment for men, but Fraterrigo reveals that its vision of abundance, pleasure and individual freedom soon placed the magazine at the center of mainstream debates about sex and freedom, politics and pleasure in postwar America. She shows that for Hugh Hefner, the good life meant the playboy life in which expensive goods and sexually available women were plentiful, obligations were few and if one worked hard enough, one could enjoy abundant leisure and consumption. In support of this view, Playboy attacked early marriage, traditional gender arrangements and sanctions against premarital sex. The magazine also promoted private consumption as a key to economic growth and national well-being, offering tips from The Playboy Advisor on everything from high-end stereos and cuff links to caviar and wine. If we want to understand post-war America, Fraterrigo shows, we must pay

close attention to Playboy its messages about pleasure and freedom the debates it inspired and the criticism it drew all of which has been bound up in the popular culture and consumer society that surround us *The Routledge Companion to Contemporary Architectural History* Duanfang Lu,2023-07-31 The Routledge Companion to Contemporary Architectural History offers a comprehensive and up to date knowledge report on recent developments in architectural production and research Divided into three parts Practices Interrogations and Innovations this book charts diversity criticality and creativity in architectural interventions to meet challenges and enact changes in different parts of the world through featured exemplars and fresh theoretical orientations The collection features 29 chapters written by leading architectural scholars and highlights the reciprocity between the historical and the contemporary research and practice and disciplinary and professional knowledge Providing an essential map for navigating the complex currents of contemporary architecture the Companion will interest students academics and practitioners who wish to bolster their understanding of built environments

Form Follows Libido Sylvia Lavin, 2007-09-28 How modern architecture came to embrace the urges and fears of the affective unconscious Eight million Americans a year cool their heels in psychiatric waiting rooms Design can help lower this nervous overhead Richard Neutra 1954 Sylvia Lavin's *Form Follows Libido* argues that by the 1950s some architects felt an urge to steer the cool abstraction of high modernism away from a neutral formalism toward the production of more erotic affective environments Lavin turns to the architecture of Richard Neutra 1892 1970 to explore the genesis of these new mood inducing environments In a series of engaging essays weaving through the designs and writings of this Vienna born California based architect Lavin discovers in Neutra a sustained and poignant psychoanalytic reflection set in the context of a burgeoning psychoanalytic culture in America Lavin shows that Neutra's redirection of modernism constituted not a lyrical regression to sentimentality but a deliberate advance of architectural theory and technique to engage the unconscious mind fueled by the ideas of psychoanalysis that were being rapidly disseminated at the time In Neutra's responses to a vivid range of issues from psychoanalysis proper to the popular psychology of tele evangelical prayer Lavin uncovers a radical reconstitution of the architectural discipline Arguing persuasively that the received historical views of both psychoanalysis and architecture have led to a suppression of their

compelling coincidences and unorthodoxies Lavin sets out to unleash midcentury architecture's hidden libido Neither Neutra nor psychoanalysis emerges unscathed from her investigation of how architecture came to be saturated by the intrigues of affect often against its will If Reyner Banham sought to put architecture on the couch then Lavin through Neutra leaps beyond Banham's ameliorative aim to lure contemporary architecture into the lush and dangerous liaisons of environmental design

Modern Architecture and Climate Daniel A. Barber, 2023-04-11 How climate influenced the design strategies of modernist architects Modern Architecture and Climate explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control He looks at projects by well known architects such as Richard Neutra Le Corbusier Lcio Costa Mies van der Rohe and Skidmore Owings and Merrill and the work of climate focused architects such as MMM Roberto Olgyay and Olgyay and Cliff May Drawing on the editorial projects of James Marston Fitch Elizabeth Gordon and others he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design Extensively illustrated with archival material Modern Architecture and Climate provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today's zero carbon design **Grove**
