Epistemologies Megan Simpson,2000-02-03 Through detailed readings and interviews this book provides a valuable introduction to feminist language poets and to some of the most compelling issues in contemporary poetry Theory into Poetry ,2022-05-20 At the beginning of the 21st century there is still no generally accepted comprehensive definition of the lyric or differentiated modern toolkit for its analysis The reception of poetry is largely characterised either by an empathetic identification of critics with the lyric persona or by exclusive interest in formal patterning The present volume seeks to remedy this deficit All the contributors theorise the lyric to overcome the impasse of an impressionistic and narrowly formalistic critical debate on the genre Their papers focus on a variety of different questions the problem of establishing a framework for definition and classification the search for dynamic and potent critical approaches investigations of poetry's cultural performance and its fundamental relevance for the construction of group cohesion The essays collected in this volume offer a consciously polyphonic range of theories and interpretations suggesting to the reader a variety of theoretical frameworks and practical illustrations of how a discussion of poetry may be firmly grounded in modern literary theory

Hix,2008 New work from the National Book Award finalist The Sound of Poetry / The Poetry of Sound Marjorie Perloff,Craig Dworkin,2009-10-15 Sound one of the central elements of poetry finds itself all but ignored in the current discourse on lyric forms The essays collected here by Marjorie Perloff and Craig Dworkin break that critical silence to readdress some of the fundamental connections between poetry and sound connections that go far beyond traditional metrical studies Ranging from medieval Latin lyrics to a cyborg opera sixteenth century France to twentieth century Brazil romantic ballads to the contemporary avant garde the contributors to The Sound of Poetry The Poetry of Sound explore such subjects as the translatability of lyric sound the historical and cultural roles of rhyme the role of sound repetition in novelistic prose the connections between sound poetry and music between the visual and the auditory the role of the body in performance and the impact of recording technologies on the lyric voice Along the way the essays take on the ensemble discords of Maurice Scève's D. lie Ezra Pound's use of Chinese whispers the alchemical theology of Hugo Ball's Dada performances Jean Cocteau's modernist radiophonics and an intercultural account of the poetry reading as a kind of dubbing A genuinely comparatist study The Sound of Poetry The Poetry of Sound is designed to challenge current preconceptions about what Susan Howe has called articulations of sound forms in time as they have transformed the expanded poetic field of the twenty first century
