Constant Flux A Study Of Class Mobility In Industrial Societies:

The Constant Flux Robert Erikson, John H. Goldthorpe, 1992 This is a study of social mobility within the developing class structures of modern industrial societies based on a unique data set constructed by Robert Erikson and John Goldthorpe The focus is on the experience of European nations western and eastern in the period of the long boom following the Second World War but the book also devotes separate chapters to examining the experience of the USA Australia and Japan The authors combine historical and statistical approaches in their analysis of both trends in mobility and of cross national similarities and differences They show that wide variation at the level of actually observed mobility coexists with a surprising degree of constancy and commonality in underlying patterns of social fluidity The empirical results of their study serve as the basis for a critical re examination of current theories of mobility and for raising more general issues of the proper concerns and methods of comparative macro sociology

Economy and Society in Europe Luigi Burrioni, Maarten Keune, Guglielmo Meardi, 2012 Drawing on the development of economic sociology over the past 40 years this book brings together leading scholars to explore the relationship between social institutions on economic processes Inspired in particular by the innovative and creative dimensions of Colin Crouch's work they signpost directions for future research It will be an important reader for international scholars exploring the unfolding dimensions of contemporary relations in economy and society Jacqueline O'Reilly University of Brighton Business School UK Improving our understanding of how economy and society interrelate in Europe is of paramount importance The rigorous and thought provoking analyses about the interaction between markets and the institutions of society contained in this book undoubtedly represent an excellent example of how this improvement can be achieved especially in these times of crisis Andr s Rodr guez Pose London School of Economics UK This book offers a refreshing account of the deep changes occurring over recent years in the relationship between economy and society in Europe This is of course a classical theme since Max Weber's work but the social institutions which shape economic performance have profoundly evolved as have the analytical categories used to understand them The contributions in this volume provide a broad and interesting perspective dealing with issues as varied as industrial relations welfare regimes families and the labour market universities local governance and many others In the wake of the financial crisis the major theories on the role of such institutions are found partly unsatisfactory as the boundaries between economy and society are constantly shifting Everyone interested in improving our analytical tools to understand the direction of change in Europe should welcome this book Marino Regini University of Milan Italy While an economy is always embedded in society the relationship between the two is undergoing profound changes in Europe resulting in widespread instability which is

emphasised by the current crisis This book analyses these changes and in particular pressures of intensifying international competition globalization and financialization within Europe Combining the perspectives of economic sociology political economy and political science the expert contributors offer an in depth multidisciplinary insight to the functioning of a number of institutional arenas around which European economies and societies are organized Areas explored include the state and public policy at European national and regional level the welfare state industrial relations systems education systems and the family This challenging and thought provoking book will be of great interest to a wide ranging audience across a number of disciplines including European studies political science comparative political economy economic sociology industrial relations and social policy
