Weighty Issues Jeffery Sobal,2017-09-08 Many people consider their weight to be a personal problem when then does body weight become a social problem Until recently the major public concern was whether enough food was consistently available As food systems began to provide ample and stable amounts of food questions about food availability were replaced with concerns about ideal weights and appearance These interests were aggregated into public concerns about defining people as too fat and too thin Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created maintained and promoted within various social environments While there is much objectivist research concerning weight problems few studies address the socially constructed aspects of fatness and thinness This book however draws from and contributes to social constructionist perspectives The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness The contributors consider historical foundations medical models gendered dimensions institutional components and collective perspectives These different perspectives illustrate the multifaceted nature of obesity and eating disorders providing examples of how a variety of social groups construct weight as a social problem

A Psychology of Gesture Charlotte Wolff,2015-08-11 Originally published in 1945 this title was a follow up to the author's previous book The

Human Hand This time she looks at the psychology of gesture and its relation to personality The special place that a psychology of gesture merits is obvious It permits a direct knowledge of personality without any effort or misleading co operation on the part of the subject since it can be applied without his being aware of the fact The book is constructed on a system of clinical studies and medico psychological interpretations The author felt that this title must be regarded as a complementary study to her main studies *Constitution-types in Delinquency* Wilhelmus Antonius Willemse,1932

Banner,2010-12-15 A uniquely revealing biography of two eminent twentieth century American women Close friends for much of their lives Ruth Benedict and Margaret Mead met at Barnard College in 1922 when Mead was a student Benedict a teacher They became sexual partners though both married and pioneered in the then male dominated discipline of anthropology They championed racial and sexual equality and cultural relativity despite the generally racist xenophobic and homophobic tenor of their era Mead s best selling *Coming of Age in Samoa* 1928 and *Sex and Temperament in Three Primitive Societies* 1935 and Benedict s *Patterns of Culture* 1934 *Race* 1940 and *The Chrysanthemum and the Sword* 1946 were landmark studies that ensured the lasting prominence and influence of their authors in the field of anthropology and beyond With unprecedented access to the complete archives of the two women including hundreds of letters opened to scholars in 2001 Lois Banner examines the impact of their difficult childhoods and the relationship between them in the context of their circle of family friends husbands lovers and colleagues as well as the calamitous events of their time She shows how Benedict inadvertently exposed Mead to charges of professional incompetence discloses the serious errors New Zealand anthropologist Derek Freeman made in his famed attack on Mead s research on Samoa and reveals what happened in New Guinea when Mead and colleagues engaged in a ritual aimed at overturning all gender and sexual boundaries In this illuminating and innovative work Banner has given us the most detailed balanced and informative portrait of Mead and Benedict individually and together that we have had From the Hardcover edition **Books in Series, 1876-1949** R.R.
