McLaren, 2008-04-08 Why are some regimes democratic while others are not Specifically how have Spain and Italy managed to become democratic while Turkey which shares many similar characteristics has not Spain Italy and Turkey have shared common historical features which would have been disruptive to any new democracy however they represent a wide array of democratization experiences Providing a comparative case study analysis this book offers some clues as to the reasons for successful transitions to democracy This is done through a range of variables which include the degree of stateness problems learning from previous experiences with democracy and authoritarianism economic development the procedures used for designing the new rules of the regime the existence or absence of civil society and the connection between society and political institutions the democratic rules themselves the professionalization of the military the influence of external factors on democratic consolidation By examining these variables across the three countries Lauren McLaren narrows the range of possible explanations for differences in democratic consolidation The book will be of particular interest to students and researchers of European Politics and Democratization Studies

Building Democracy in Iraq Yash Ghai, Yahia Said, Mark Lattimer, 2003-02-12 For decades the people of Iraq have lived with the very opposite to democracy Gross violations of human rights have been

targeted at specific ethnic and religious groups and the combined effects of economic sanctions and two wars have left the population impoverished and highly dependent on the state for their basic needs As the possibility of a transition increases this report presents the first detailed analysis of the options for a constitutional process and the establishment of inclusive democracy in a post totalitarian Iraq It considers the need to entrench those features that are essential to a genuinely democratic society including fair representation cooperation between communities the rule of law and respect for human rights In particular it analyses the risk posed by inter ethnic and inter confessional conflict and the action necessary to try and avoid it Minority Rights Group International takes no position on the legitimacy of the use of force against Iraq However as the possibility of political change increases it is essential to consider the requirements for protecting minority rights and promoting human development Drawing on the detailed views of internationally renowned experts in conflict prevention human rights inter ethnic issues and constitutional law this report presents a set of ground rules for building inclusive democracy in Iraq based on the self determination of Iraq s people

Building Democracy in Contemporary Russia Sarah L. Henderson,2018-07-05 Can foreign donors help build new democracies In the 1990s public and private organizations such as USAID and the Soros Foundation poured huge amounts of money and expertise into Russia to help build the dream of a vibrant democratic society Sarah L Henderson argues that despite the altruistic intentions of foreign assistance agencies and domestic activists foreign aid designed to spur civic growth has had unintended consequences Drawing on extensive field work survey research and work experience for several funding agencies in Moscow in the late 1990s Henderson focuses on donor efforts to support the emerging community of nongovernmental organizations and in particular on efforts to build a functioning women s movement in Russia Her intimate knowledge of Russia s growing NGO community informs a worrisome finding foreign aid has made a tremendous difference but not in altogether expected or positive ways New Russian civic groups serve either the needs of an indigenous clientele or the demands of the foreign aid bureaucracy but rarely both Henderson s research and experience show that while aid has kept a fledgling civic community alive it is a civic community that is disconnected from its own domestic audience The book suggests that large flows of foreign aid have in some ways damaged the long term prospects for democratization in Russia

Creating Democracy Charles Hersch, 2025-02-03 Creating Democracy brings into dialogue for the first time two important theorists of democracy Hannah Arendt 1906-75 and Mikhail Bakhtin 1895-975 Their shared conception of democracy stemming from their encounters with totalitarian governments Nazi Germany for Arendt and Stalinist Russia for Bakhtin and the rise of authoritarian populism in both Europe and America make their ideas more relevant than ever Charles Hersch contends that Arendt and Bakhtin have a unique vision of democracy that centers on creation and creativity These two thinkers imagine a world that both makes room for the cultivation and expression of each person's individuality and facilitates healthy interdependence one that does not reduce us to sameness They also describe the many threats to such a humanistic world whether ideological social or political Creating Democracy also makes a unique contribution to debates in political theory about the possibility of freedom in modern society Offering an alternative to poststructuralism and liberalism Arendt and Bakhtin show us how in a variety of complex ways subjects who are influenced by their culture especially by the language in which they speak and think can nonetheless help construct themselves and the world For both thinkers humans are meaning making beings who shape the world primarily through language even as it shapes us This book brings to light a rich vision of democracy that is sorely needed in a time when authoritarianism threatens us more than it has in decades Students and scholars in political science cultural studies and literature will all find this book indispensable

Engaging the Community in Decision Making Roz Diane Lasker, John A. Guidry, 2009-03-23 In recent years the rapidly growing field of community participation has promised to give people formerly excluded from decision making an influential voice about issues that affect their lives Inclusive processes implemented in the United States and internationally have certainly given community members new opportunities to participate and be involved but how effective are these processes in promoting the voice and influence of the people who have historically been excluded the most the poorest least educated and most marginalized residents in communities Of the various participants who have a seat at the table whose voices are influential whose aren t and why This book summarizes how five community partnerships working with a team of researchers attempted to answer these critical questions Investigating 10 cases two from each community partnership the study tracks the ideas of everyone involved and reveals how and why the ideas of marginalized and ordinary residents were far less likely to be influential than those of people with more clout resources or acknowledged expertise Finally the authors explain how and why these influence inequities can be overcome providing readers with practical evidence based tools to help them do so The book should be helpful to readers involved in any form of active community participation from participatory research to civic engagement deliberative democracy and community initiatives Instructors

Lerner, 2024-02-06 Drawing on the tools of game design to fix democracy Anyone who has ever been to a public hearing or community meeting would agree that participatory democracy can be boring Hours of repetitive presentations alternately alarmist or complacent for or against accompanied by constant heckling often with no clear outcome or decision Is this the best democracy can offer In Making Democracy Fun Josh Lerner offers a novel solution for the sad state of our deliberative democracy the power of good game design What if public meetings featured competition and collaboration such as team challenges clear rules presented and modeled in multiple ways measurable progress such as scores and levels and engaging sounds and visuals These game mechanics would make meetings more effective and more enjoyable even fun Lerner reports that institutions as diverse as the United Nations the U S Army and grassroots community groups are already using games and game like processes to encourage participation Drawing on more than a decade of practical experience and extensive research he explains how games have been integrated into a variety of public programs in North and South America He offers rich stories of game techniques in action in children s councils social service programs and participatory budgeting and planning With these real world examples in mind Lerner describes five kinds of games and twenty six game mechanics that are especially relevant for democracy He finds that when governments and organizations use games and design their programs to be more like games public participation becomes more attractive effective and transparent Game design can make democracy fun and make it work [Making Democracy in Spain](#) Joe Foweraker, 2003-10-02 This book exploring the making of democracy in Spain during the twenty long years before the death of Franco seeks out the beginnings of democratic struggles at the grass roots of civil society Rather than one more account of the transition to democracy in Spain this is the story of the countless unsung heroes who prepared the political terrain of this transition The story suggests that it was social needs and economic demands which spawned individual discontent and political dissent but that the struggle itself required continual political organization and calculation The book therefore explores the personal networks and political strategies which sustained the struggle and reveals that their contribution to the making of democracy was often contradictory and always piecemeal Democratic struggle is not defined by a single idea of democracy but by myriad attempts to achieve more autonomous action and more effective forms of representation
