Consuming Knowledge:

Consuming Knowledge: Studying Knowledge Use in Leisure and Work Activities Steven D. Silver, 2012-12-06 It is difficult to overstate the importance of personal consumption both to individual consumers and to the economy While consumer are recognized as valuing market goods and services for the activities they can construct from them in the frameworks of several disciplines consequences of the characteristics of goods and services they use in these activities have not been well studied In the discourse to follow I will contrast knowledge yielding and conventional goods and services as factors in the construction of activities that consumers engage in when they are not in the workplace Consumers will be seen as deciding on non work activities and the inputs to these activities according to their objectives and the values and cumulated skills they hold I will suggest that knowledge content in these activities can be efficient for consumer objectives and also have important externalities through its effect on productivity at work and economic growth The exposition will seek to elaborate these points and contribute to multi disciplinal dialogue on consumption It takes as its starting point the contention that consumption is simultaneously an economic and social psychological process and that integration of content can contribute to explanation

Consuming the Environment Myra J. Hird, 2024-11-29 Consuming the Environment explores the environmental impacts of consuming everyday products and explains how we can consume more sustainably Written in an accessible style this book begins with our everyday mundane experiences of consuming products online in the grocery store at the mall and shows how these practices are connected to a global system dependent upon ever increasing consumption Drawing on the expertise of researchers in topics such as energy food water land fashion electronics eco tourism green products and micro plastics this volume unpacks the complex and largely invisible relationships that consumerism has with resource extraction and manufacturing By focusing on a diverse range of everyday consumer products as well as more subtle things that have been transformed into products such as knowledge waste and pets the chapters are structured around the central argument that we must re orient ourselves as citizens rather than consumers It is as citizens that we may help to organize our communities and hold our governments and industry accountable to planetary sustainability boundaries With the inclusion of summary boxes directed discussion assignment questions and further reading in each chapter this book will be an essential resource for undergraduate and postgraduate students studying courses on consumerism sustainable consumption and environmental sociology

Status Through Consumption Steven D. Silver, 2012-12-06 Consumption takes place in settings or environments which have both direct and indirect effects on its dynamic path Direct effects of environments on activities in consuming can occur through constraints that environments impose Environment can also have indirect effects on consumption through enduring modification of internalized constructs which enter heuristics for decisions on activities The importance of environments to consumption is increased by the definitional dependence of status on the judgements of others This study examines microprocessing in consumer activities for status as it interacts with structure in

the environments of these activities The importance of environments in status activities provides the basis for a separate but related inquiry into observed differences in the form they take across societies Conjecture on the consequences of differences in the structure of environments for consumption that typify a society is studied in the narrative statements by members of comparison societies and in the content of print advertising in these societies Evolutionary processes which could establish observed differences in structure across societies are also considered in both their systematic and random components I review models of random drift and stochastic resonance as candidate forms for generating observed structure in environments Directions for the subsequent study of status through consumption are discussed P Introduction Status Through Consumption Knowledge Use in Nonwork Activities for Status Interactions of Consumer Microprocessing and Structured Environments Activity Feedback and the Stability of Structure Awards and Honors Systems in Structured Environments Cross Societal Comparisons of Narrative Statements on Consuming for Status Comparative Analyses of Consumption Appeals in the Print Advertising of the USA and France 1955 1991 Random Process in the Generation of Structured Environments Overview and directions for Study of Status Through Consumption **Knowledge**

Communication in Global Organisations Nils Braad Petersen, 2022-12-30 While organisations become more and more global they also become more and more dispersed and virtual This challenges the sense of a shared organisational identity and the ability of employees to communicate personally held knowledge To address these challenges this book offers an innovative multidisciplinary approach to knowledge communication in global organisations The book develops a multidisciplinary analytical lens through which to understand employee identity formations and knowledge communication practises Using detailed analyses of interviews from a real organisation the book builds an understanding of how 21st century employees make sense of a virtual organisational reality characterised by multiple simultaneous projects and virtual dispersed teams These analyses are conducted using a new discourse analysis method for analysing research interviews Discursive Sensemaking Analysis Using these methods and findings researchers project managers and HR professionals will be able to analyse their own organisations to discover how employees make sense of the complexity of 21st century global organisations **Enabling Indigenous Knowledge Systems in Action Research and Action Learning** Mapotse, Tomé

Awshar, Tetteh, Emmanuel N. A., Matsekoleng, Tsebo Kgoto, 2025-05-29 After centuries of colonialism and imperialism many indigenous knowledge systems have been purposefully disregarded and forgotten to the point that the vast majority of the public but specifically researchers are completely unaware of their existence By utilizing these systems in conjunction with action learning and action research it can be possible to garner perspective and influence from all types of people regardless of their social or economic standing in working towards an inclusive and prosperous global society Enabling Indigenous Knowledge Systems in Action Research and Action Learning encourages researchers the world over to apply Indigenous Knowledge Systems IKS using Action Research and or Action Learning AR AL approaches in their fields of specialization The

AR AL framework approaches and methodologies cut across almost all field of studies Covering topics such as action research and learning coloniality and professional development this book is an excellent resource for researchers academicians educators pre service teachers sociologists and more

Consuming Knowledge: Studying Knowledge Use in Leisure and Work Activities Steven D. Connecting Knowledge and Performance in Public Services Kieran Walshe,Gill Harvey,Pauline Jas,2010-09-30 The performance of public services is now more closely scrutinised than ever before Every teacher doctor social worker or probation officer knows that behind them stands a restless army of overseers equipped with a panoply of league tables star ratings user opinion surveys performance indicators and the like with which to judge them This increased scrutiny and performance measurement has undoubtedly produced improved public services Yet we still have a limited understanding about how this information can be best used to bring about improvements in performance What goes on inside the black box of public organisations to move from information to action or from knowing to doing This book tackles this important question by reviewing a wide range of performance mechanisms It explores how information about performance can be translated into improvements in services and conversely why this does not always happen in practice

Sustainable Production Consumption Systems Louis Lebel, Sylvia Lorek, Rajesh Daniel, 2009-12-02 Sustainable Production Consumption Systems brings together a set of designed case studies intended to provide a more in depth understanding of challenges and opportunities in bringing knowledge and actions closer together for the sustainable management of specific production and consumption systems The case study approach enabled researchers to engage directly with some of the actors involved in the production consumption or regulation of specific goods or services and other stakeholders affected by those processes Such engagement was particularly worthwhile when it helped

mobilize actors to pursue linking knowledge with action in ways that improve the prospects for sustainability **Labor of Learning** Alexander Sidorkin, 2019-02-11 This book is about the end of an era in education It argues that schooling as we know it will cease to exist and be replaced with something else Education will undergo a radical fundamental change replacing traditional compulsory schooling with a market based system of learning that is finely tuned to demand and does not rely on extra economic coercion The premise of the book is to treat school learning as a form of labor Its genre lies somewhere between educational theory and a political economy of education The author explores the origins of the contemporary mass schooling models and redefines school learning in terms of labor with special reference to genesis of education and to the history of childhood in its connection with schooling Schools are described as islands of non market semi feudal economies in the midst of the sea of markets which explains some of the most common worries about learning motivation The book offers several critiques of the most influential thoughts on schooling today Progressivism the Human Capital theory the belief in intrinsic motivation the voucher movement and the accountability reform And finally it outlines two alternative solutions for educational problems which stem from the essential lack of learning motivation This book is an invitation to resurrect the tradition of asking fundamental questions about education Improving what is essentially a flawed institution can take us only so far the author is inviting the reader to go further Knowledge-Oriented Applications in Data Mining Kimito Funatsu, 2011-01-21 The progress of data mining technology and large public popularity establish a need for a comprehensive text on the subject The series of books entitled by Data Mining address the need by presenting in depth description of novel mining algorithms and many useful applications In addition to understanding each section deeply the two books present useful hints and strategies to solving problems in the following chapters The contributing authors have highlighted many future research directions that will foster multi disciplinary collaborations and hence will lead to significant development in the field of data mining *The European Higher Education Area*, 2019-02-11 This volume presents the state of the art with respect to the most important elements of the Bologna process The reflections on the past are also used to fuel the debate on the next decade In 2008 the Flemish Ministry of Education and Training invited the editors to produce a volume with chapters discussing topics that are deemed to be most salient in the coming decade Based on a tentative list of themes to be covered initially suggested by the Ministry the editors have solicited contributions from appropriate scholars experts on the specific topics As a result this volume contains a rich set of chapters which address the promises and perils of the Bologna process and its preliminary outcomes A difficult task given that the process is a target on the move and even changing in nature during the process It is also a difficult task because evidence can be interpreted differently paving the way for new paradoxes and complex interactions between the actors in the field Consequently we are faced with new questions every time we believe answers to old questions have been found The contributors to the volume not necessarily agree in their analyses of the Bologna process but there is nevertheless a fair amount of consensus According to their

analyses governance quality mobility and diversity are the topics that have been most important to the Bologna process in the past and will be at centre stage in future discussions The book is meant to be a reflective exercise for those involved in whatever way in the Bologna process researchers teachers managers political decision makers The material is also relevant to those outside of the countries currently subscribing to the Bologna process 2013 International Conference on
