Schizophrenia Explained Siegfried Kasper, 2003-12 When there is a problem what people want most of all is information This applies especially when the problem is a medical one which is affecting either themselves or a family member Doctors sometimes just don't have the time to explain everything in detail and to answer every question As a consequence patients and their families must turn to other sources of information such as articles books and the internet However it is difficult if not impossible for the lay public to know whether the information they are getting is accurate and up to date Hence this new book series All the books in the Explained Series are written especially for the lay public by top specialists so the reader can be assured that he or she is getting the correct advice

Psychiatry and Neuroscience Update - Vol. V Pascual Ángel Gargiulo, Humberto Luis Mesones-Arroyo, 2024-12-28 This book offers a multidisciplinary approach to the phenomenon of addiction including a discussion of its anthropological neurological psychiatric and social aspects The editors have maintained this multidisciplinary criterion since the first volume of the Psychiatry and Neuroscience Update collection Approaching a topic from multiple points of view guides the mentality to open to biological and psychological relationships and facilitates translational extrapolations The ability to establish relationships closer or more distant but always binding is thus stimulated whether for study research or the interpretation of clinical reality As in previous volumes the book opens with a part dedicated to anthropological and philosophical aspects thus ensuring the validity of the humanistic aspect Intersubjectivity epistemological reflections the meaning of ecstasy and philosophical reflection leading to therapy are explored Part 2 From Basic Neurosciences to Human Brain presents a set of basic investigations with high translational content This corresponds with the editors intention to build bridges here between the basic and the clinical favoring the translational Chapters present topics of interest to both fields such as the neurobiology of addictions cocaine and benzodiazepines Part 3 establishes links between neurosciences learning teaching and the social environment It begins with a chapter on executive functioning before discussing excessive use of computer technology and educational interventions for

patients with alcohol addiction The fourth part of the book attempts to explain pathological human behavior It is about establishing links between brain disorders and diseases in the strict sense Among other topics chapters deal with cognitive dysfunction in addiction neuroimaging and stigma around substance use disorders Psychiatry and Neuroscience Update Addiction From Laboratory and Anthropology to Clinical Practice Vol V was edited and authored by a multidisciplinary group of authors and will be vital for an equally multidisciplinary group of readers psychiatrists psychologists neuroscientists and any other clinician or researcher that is interested in addictions Those in the humanities particularly anthropologists and philosophers will find the first part of great interest

Contemporary Treatment of Psychosis Jon G. Allen, Dean T. Collins, 1996-07-01 The introduction of antipsychotic medication in the 1950s produced a revolution in the treatment of the severely mentally ill Unfortunately despite early optimism these drugs did not cure schizophrenia Treatment of psychotic illness on the biological level is never sufficient Based on the treatment approach of the famous Menninger clinic this book affirms the central role of nurturing a therapeutic relationship with psychotic patients and their families through a clear and unequivocal psychological understanding and acceptance This approach does not settle for compliance with the treatment programme but fosters the active participation of the patient and family in the design of the treatment plan to promote growth toward awareness and autonomy

Internal Medical Care of Cancer Patients Yeung, 2007-03 This comprehensive text defines and addresses the broad spectrum of acute and chronic internal medicine disorders that occur in cancer patients and cancer survivors as side effects of the disease itself or from treatment regimens
