Contemporary Futures Perspectives From Social Anthropology:

Contemporary Futures Sandra Wallman, 2003-12-16 *Contemporary Futures* explores the implications of visualising the future and the consequences this has on the present and on our relationship with other cultures

Contemporary Futures Sandra Wallman, 2003-12-16 In industrial societies imagining the future is a serious business our assumptions about the future govern the present management of domestic national and global resources and are projected some would say inflicted on societies whose visions are different *Contemporary Futures* focuses not so much on whether the future can be known but on interpreting the way we and others picture it The contributors all social anthropologists explore the effects that this picture has on the present on group identity and belief in the self and its survival on our relationships with other cultures and on the future itself They provide a cross cultural perspective on a range of futures visualised at this time and discusses the implications of

Human Activities and the Tropical Rainforest Bernard K. Maloney, 2013-11-11 Arising initially from a conference the papers published here have been integrated into book form to provide information on human activities and the tropical rainforest in the past and present and on the possible future of the rainforest in a unique way Other books have considered some but not all of these themes however none has stressed the continuity of change over time and its possible outcome for the people of the forest as well as for the forest itself Because of the approach taken this book should appeal across traditional disciplinary boundaries Indeed a prime aim has been to suggest that rainforest because of its complexity and the complexity of people rainforest relationships throughout time deserves study from a broad perspective This book poses more questions than answers about the rainforest and it is hoped that it will encourage readers to think about the rainforest in a wider way than hitherto This book is aimed at geographers physical and human social anthropologists archaeologists pedologists foresters and tropical botanists and will be of value to graduates of various disciplines setting out to research the rainforest

Living with Separation in China Charles Stafford, 2003-09-02 First Published in 2004 Separation for example the process of leaving behind temporarily or permanently individuals to whom we are attached is something experienced by humans in all societies In the case of China the rituals and practices associated with separation and with its corollary reunion are especially elaborate They are crucial elements within the Chinese cultural tradition In addressing through the use of case studies the central theme of separation this book also provides a good general introduction to many of the classic debates within anthropological and historical analyses of China It will therefore prove an interesting and useful resource to students of Asian studies and anthropology as well as the general reader with an interest in the Chinese cultural tradition

Anthropologies and Futures Juan Francisco Salazar, Sarah Pink, Andrew Irving, Johannes Sjöberg, 2020-05-15 Anthropology has a critical practical role to play in contemporary debates about futures This game changing new book presents new ways of conceptualising how to engage with a future oriented research agenda demonstrating how anthropologists can approach futures both theoretically and practically and introducing a set of

innovative research methods to tackle this field of research Anthropology and Futures brings together a group of leading scholars from across the world including Sarah Pink Rayna Rapp Faye Ginsburg and Paul Stoller Firmly grounded in ethnographic fieldwork experience the book's fifteen chapters traverse ethnographies with people living with HIV AIDS in Uganda disability activists in the U S young Muslim women in Copenhagen refugees in Milan future makers in Barcelona planning and land futures in the UK the design of workspaces in Melbourne rewilding in the French Pyrenees and speculative ethnographies among emerging communities in Antarctica Taking a strong interdisciplinary approach the authors respond to growing interest in the topic of futures in anthropology and beyond This ground breaking text is a call for more engaged interventional and applied anthropologies It is essential reading for students and researchers in anthropology sociology cultural studies design and research methods

Audit Cultures Marilyn Strathern, 2003-12-08 Do audit cultures deliver greater responsibility or do they stifle creative thought We are all increasingly subjected to auditing and alongside that subject to accountability for our behaviour and actions Audit cultures pervade in the workplace our governmental and public institutions as well as academia However audit practices themselves have consequences beneficial and detrimental that often go unexamined This book examines how pervasive practices of accountability are the political and cultural conditions under which accountability flourishes and the consequences of their application Twelve social anthropologists look at this influential and controversial phenomenon and map out the effects around Europe and the Commonwealth as well as in contexts such as the European Commission the International Monetary Fund and Academic institutions The result provides an excellent insight into auditing and its dependence on precepts of economic efficiency and ethical practice This point of convergence between these moral and financial priorities provides an excellent opening for debate on the culture of management and accountability

Global Futures Jan Nederveen Pieterse, 2000 This work looks beyond the problems of accelerating globalization to examine how humanity can shape it The contributors suggest a variety of perspectives changes policies and institutional reforms to strive for in our increasingly inter connected world

Conflicts in Conservation Stephen M. Redpath, R. J. Gutiérrez, Kevin A. Wood, Juliette C. Young, 2015-05-07 An insightful guide to understanding conflicts over the conservation of biodiversity and groundbreaking strategies to deal with them

Old Colony Mennonites in Argentina and Bolivia Lorenzo Cañas Bottos, 2008-01-31 This volume challenges received images of Old Colony Mennonites as living in the past or perfect examples of community Through the concept of the imagination of the future this book presents an analysis of their historical transformations as the result of attempting to apply in practice their Christian ideals of building a community of believers in the world while remaining separate from it It argues that while they contributed to the territorialisation of the states that hosted them through their migrations from sixteenth century Europe to late twentieth century Latin America they systematically rejected being incorporated into the nation through the building of a community of agricultural settlements that maintain ties across international borders It explores how these imaginations are maintained

and transformed through the analysis of schisms conflict and border management together with a biographical approach to conversion narratives and the religious experience *Waiting for Macedonia* Ilk  Thiessen, Ilka Thiessen, 2007-01-01 Thiessen crafts a fine ethnography of a changing society after the fall of socialism and independent nationhood Anastasia Karakasidou Wellesley College *Shifting Contexts* Marilyn Strathern, 2012-09-10 To suppose anthropological analysis can shift between global and local perspectives may well imply that the two co exist as broader and narrower horizons or contexts of knowledge The proof for this can be found in ethnographic accounts where contrasts are repeatedly drawn between the encompassing realm and everyday life or in value systems which simultaneously trivialise and aggrandise or in shifts between what pertains to the general or to the particular **Anthropological Journeys** Meenakshi Thapan, 1998 This collection of papers raises methodological issues and questions concerning the traditional nature of anthropology and addresses current issues and debates in sociology and social anthropology The essays in this volume by well known anthropologists take up these and other issues arising out of their own fieldwork experience The result is a rigorous and deeply moving analysis that leads to an unlearning of inappropriate and insensitive methods that obscure rather than explain the lives of people **Introduction to Sustainable Development - Volume I** David V. in Papua New Guinea Indonesia and Malaysia India Africa the Middle East and Mexico juggle universalist commitments with roots in local cultural milieus and particular communities Anthropology and the New Cosmopolitanism breaks new ground in theorizing the role of social anthropology as a discipline that engages with the moral economic legal and political transformations and dislocations of a globalizing world It introduces the reader to key debates surrounding cosmopolitanism in the social sciences and is written clearly and accessibly for undergraduates in anthropology and related subjects

Access to Origins Mary W. Helms, 2010-07-05 In many non industrial non Western societies power and prestige are closely linked to the extent of an individual s or group s perceived connection to the supernatural realm which also explains and validates tangible activities such as economic success victories in war or control over lucrative trade Affines in laws ancestors and aristocrats in particular are connected to the realm of creative cosmological origins i e to Genesis which accords them distinctive supernatural powers and gives them a natural and legitimate right to worldly authority This is the hypothesis that Mary W Helms pursues in this broadly cross cultural study of aristocracy in chiefly societies She begins with basic ideas about the dead ancestors affines and concepts of cosmological origins This leads her to a discussion of cosmologically defined hierarchies the qualities that characterize aristocracy and the political and ideological roles of aristocrats as wife givers and wife takers that is as in laws She concludes by considering various models that explain how societies may develop or define aristocracies
