women to reform prisons International Who's who in Music and Musicians' Directory ,1992 **Firm Interests** Cornelia Woll,2018-07-05 Firms are central to trade policy making Some analysts even suggest that they dictate policy on the basis of their material interests Cornelia Woll counters these assumptions arguing that firms do not always know what they want To be sure firms lobby hard to attain a desired policy once they have defined their goals Yet material factors are insufficient to account for these preferences The ways in which firms are embedded in political settings are much more decisive Woll demonstrates her case by analyzing the surprising evolution of support from large firms for liberalization in telecommunications and international air transport in the United States and Europe Within less than a decade former monopolies with important home markets abandoned their earlier calls for subsidies and protectionism and joined competitive multinationals in the demand for global markets By comparing the complex evolution of firm preferences across sectors and countries Woll shows that firms may influence policy outcomes but policies and politics in turn influence business demands This is particularly true in the European Union where the constraints of multilevel decision making encourage firms to pay lip service to liberalization if they want to maintain good working relations with supranational officials In the United States firms adjust their sectoral demands to fit the government s agenda In both contexts the interaction between government and firm representatives affects not only the strategy but also the content of business lobbying on global trade

Kingdom of Württemberg and the Making of Germany, 1815-1871 Bodie A. Ashton, 2017-01-12 CHOICE Outstanding Academic Title 2017 This book examines the 1871 unification of Germany through the prism of one of its forgotten states the Kingdom of Württemberg It moves beyond the traditional argument for the importance of the great powers of Austria and Prussia in controlling German destiny at this time Bodie A Ashton champions the significance of Württemberg and as a result all 38 German states in the unification process noting that each had their own institutions and traditions that proved vital to the eventual shape of German unity The Kingdom of Württemberg and the Making of Germany 1815 1871 demonstrates that the state's government was dynamic and in full control of its own policy making throughout most of the 19th century with Ashton showing a keen appreciation for the state's domestic development during the period The book traces Württemberg's strong involvement in the national question and how successive governments and monarchs in the state's capital of Stuttgart manoeuvred the country so as to gain the greatest advantage It successfully argues that the shape of German unification was not inevitable and was in fact driven largely by the desires of the Mittelstaaten rather than the great powers the eventual Reichsgründung of January 1871 was merely the final step in a long series of negotiations diplomatic manoeuvres and subterfuge with Württemberg playing a vital regional role Making use of a wealth of primary sources including telegrams newspaper articles diary entries letters and government documents this is a vitally important study for all scholars and students of 19th century Germany
