Status of the Domestic Uranium Mining and Milling Industry

United States. Congress. Senate. Committee on Energy and Natural Resources. Subcommittee on Energy Research and Development, 1982

Mean Streets and Raging Bulls Richard Martin, 2000-01-01 Classic film noir was Hollywood's dark cinema of crime and corruption a genre underpinned by a tone of existential cynicism which stripped bare the myth of the American Dream and offered a bleak nightmarish vision of a fragmented society that rhymed with many of the social realities of forties and fifties America *Mean Streets and Raging Bulls* explores how since its apparent demise in the late fifties the noir genre has been revitalized during the post studio era The book is divided into two sections In the first the evolution of film noir is contextualized in relation to both American cinema's industrial transformation and the post Depression history of the United States In the second the evolution of neo noir and its relation to classic film noir is illustrated by detailed reference to representative texts including *Chinatown* Roman Polanski 1974 *Night Moves* Arthur Penn 1975 *Taxi Driver* Martin Scorsese 1976 *Blood Simple* Joel and Ethan Coen 1984 *After Hours* Martin Scorsese 1985 *Sea of Love* Harold Becker 1989 *Reservoir Dogs* Quentin Tarantino 1992 and *Romeo is Bleeding* Peter Medak 1994

The Third Wave of Historical Scholarship on Nigeria Saheed Aderinto, Paul Osifodunrin, 2013-02-22

This festschrift in honor of Professor Ayodeji Olukoju one of Nigeria's brightest historians brings together scholarship representative of the third wave of historical scholarship on Nigeria Olukoju a pioneering historian of Nigerian maritime history also produced significant revisionist scholarship in the areas of economic urban and infrastructure history The contributions in this volume epitomize the groundbreaking directions of his career they are marked by a search for new

explanations and venture into uncharted terrain in Nigerian history. Aside from its critical engagement of Olukoju's impressive scholarship, this volume presents chapters on such underresearched aspects of Nigerian history as sexuality, children and youth, crime, memory, and HIV/AIDS. It offers historical explanations of a host of development challenges confronting Nigeria, Africa's most populous country, and resilient reinterpretations of the place of history in nation building. The contributors, pioneering experts in their various subfields, bring their research and teaching experience to the fore and deploy neglected data as they unfold topics that shed light on Nigeria, its peoples, and cultures. They show that history, both as a daily practice and as an academic endeavor, remains vital as Africans seek solutions to the continent's critical development challenges.

Poles Apart Antoni G. Lewkowicz, 1999. *Poles Apart* covers a range of themes about the Arctic and Antarctic, including the geography, glaciology, and glacial history, ecology, living resources, governance, and history of exploration. Topics are examined separately for each pole, and each theme is summarized by a rapporteur who draws out the contrast and the similarities. This unique format allows the international experts to describe what they know best while addressing the central issues of the book. Published in English.

The Explorer's Roadmap to National-Socialism Sarah K. Danielsson, 2016-03-16. Whilst terms such as *Lebensraum* are commonly associated with National Socialist ideology of the 1930s and 40s, ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics. Focusing on one of the most influential figures within this group, Sven Hedin, this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices. The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin. In Germany, Britain, France, and Russia, their positions as publicly recognized authors and reputable academics made them highly influential with politicians. Whilst this influence was to become most visible within Hitler's Germany, the debates were not by any means restricted to or even originated in Germany. Germany was the home of some of the most prominent geographers, but this scientific community had a tradition of international debate and exchange with especially British, French, and Russian geographic societies and institutions. Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting, raising important questions about the international character and impact of National Socialism. Tracing the intellectual history of the international geographic community and its relationship to National Socialism, this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work. In so doing, the book uncovers a long-ignored or overlooked important connection between exploration, geographers, and genocide.

Handbook of Industrial Chemistry and Biotechnology James A. Kent, 2013-01-13. Substantially revising and updating the classic reference in the field, this handbook offers a valuable overview and myriad details on current chemical processes, products, and practices. No other source offers as much data on the chemistry, engineering, economics, and

infrastructure of the industry The Handbook serves a spectrum of individuals from those who are directly involved in the chemical industry to others in related industries and activities It provides not only the underlying science and technology for important industry sectors but also broad coverage of critical supporting topics Industrial processes and products can be much enhanced through observing the tenets and applying the methodologies found in chapters on Green Engineering and Chemistry specifically biomass conversion Practical Catalysis and Environmental Measurements as well as expanded treatment of Safety chemistry plant security and Emergency Preparedness Understanding these factors allows them to be part of the total process and helps achieve optimum results in for example process development review and modification Important topics in the energy field namely nuclear coal natural gas and petroleum are covered in individual chapters Other new chapters include energy conversion energy storage emerging nanoscience and technology Updated sections include more material on biomass conversion as well as three chapters covering biotechnology topics namely Industrial Biotechnology Industrial Enzymes and Industrial Production of Therapeutic Proteins

United Nations Centre on Transnational Corporations Khalil Hamdani,Lorraine Ruffing,2015-03-24 The United Nations Centre on Transnational Corporations UNCTC was established in 1975 and abolished in 1992 It was an early effort by the UN to address the overlapping issues of national sovereignty corporate responsibility and global governance These issues have since multiplied and deepened with globalization This book recounts the UNCTC experience and its lessons for international organizations This book is not only an insider perspective by two former staff but also a collective memoir of the UNCTC as an international organization that attempted with varying success to defuse the clash between corporates and states that erupted in the turbulent 1970s This personal account of the UNCTC is a mixture of history analysis reflections and critical commentaries told in different voices that penetrate the bland persona of international civil service In this retelling the authors seek to address misconceptions amongst the more general literature and to seek to provide accounts of both its positive and negative features The UNCTC experience recounted in this book holds valuable lessons for international organization and will be of interest to student scholars and practitioners alike
