Kane, 2019-11-20 This textbook provides a comprehensive introduction to modern strategy covering the context theory and practice of military strategy in all its different forms. Covering all the main issues in the field, the book explores the major themes through a combination of classical and modern strategic theory, history, and current practice. It is split into three main sections. The first provides the context for contemporary strategy and includes discussions of the human technological intelligence, ethical, and grand strategic dimensions. The second part explores the theory and practice of strategy in different geographical domains including land, sea, air, space, and cyberspace. The final part engages with three of the most challenging forms of strategy in the contemporary era: nuclear weapons, terrorism, and insurgency. This second edition brings the book up to date by including discussions of the rise and fall of the Islamic State of Iraq and Syria (ISIS), the emergence of robotics and artificial intelligence, major events in space and cyberspace, and the growing profile of nuclear weapons. Military Strategy and the Global War on Terror Alastair Finlan, 2014-06-19 Contemporary Military Strategy and the Global War on Terror offers an in-depth analysis of US and UK military strategy in Afghanistan and Iraq from 2001 to the present day. It explores the development of contemporary military strategy in the West in the modern age before interrogating its application in the Global War on Terror. The book provides detailed insights into the formulation of military plans by political and military elites in the United States and United Kingdom for Operation Enduring Freedom and Operation Iraqi Freedom. Alastair Finlan highlights the challenges posed by each of these unique theatres of operation, the nature of the diverse enemies faced by coalition forces, and the shortcomings in strategic thinking about these campaigns. This fresh perspective on strategy in the West and how it has been applied in recent military campaigns facilitates a deep understanding of how wars have been and will be fought. Including key terms, concepts, and discussion questions for each chapter, Contemporary Military Strategy and the Global War on Terror is a crucial text in strategic studies and required reading for anyone interested in the new realities of transnational terrorism and twenty-first-century warfare. *Contemporary Military Strategy* Morton H.

Ethics and Military Strategy in the 21st Century George Lucas, Jr.,2019-07-10 This book examines the importance of military ethics in the formulation and conduct of contemporary military strategy Clausewitz s original analysis of war relegated ethics to the side lines in favor of political realism interpreting the proper use of military power solely to further the political goals of the state whatever those may be This book demonstrates how such single minded focus no longer suffices to secure the interest of states for whom the nature of warfare has evolved to favor strategies that hold combatants themselves to the highest moral and professional standards in their conduct of hostilities Waging war has thus been transformed in a manner that moves beyond Clausewitz s original conception rendering political success wholly dependent upon the cultivation and exercise of discerning moral judgment by strategists and combatants in the field This book utilizes a number of perspectives and case studies to demonstrate how ethics now plays a central role in strategy in modern armed conflict This book will be of much interest to students of just war ethics military strategy and international relations

The New Makers of Modern Strategy Hal Brands, 2023-05-02

First published by Princeton in 1943, the collection of essays that constituted *Makers of Modern Strategy* has largely held the field as the key book that studied the means and ends of military power and thought and the historical figures that shaped that history. The books in two editions have long been a staple of Princeton's backlist in international politics and strategic studies. The first edition, edited by Edward Mead Earle and subtitled *Military Thought from Machiavelli to Hitler*, emerged out of a seminar of foreign policy and security experts organized between Princeton and the Institute of Advanced Study in reaction to World War II as a global conflict. The subsequent edition, edited by Peter Paret then at Stanford University, was prepared in the early 1980s and subtitled *From Machiavelli to the Nuclear Age*. In that edition, three essays were reprinted from the earlier book, four others were revised, and the remainder, twenty-two essays, were wholly new to reflect the updates in the field and also how the global political context had changed. The two books together are regarded as the founding and leading text in military and strategic studies, containing influential essays by many of the best-known scholars of the subject. The ambition of the new volume is to commission an entirely new edition of this classic reference work with 37 chapters organized into 5 sections covering key military leaders and the most important elements of strategic thinking since Thucydides and Sun Tzu. The field of strategic and military history has witnessed an intellectual renaissance in recent decades as the number of strategic challenges faced by the world has grown enormously. International politics has also changed: The Cold War ended and the Soviet Union disappeared. The United States entered a period of unipolarity only to see it challenged by the rise of new powers. China, in particular, Terrorism, civil wars, so-called rogue states, insurgency and counterinsurgency, and cybersecurity all joined a growing list of strategic concerns. New technologies promise to upend our understanding of conflict. Furthermore, scholars have learned more about earlier periods from the classic thinkers of strategy to the struggles of great power war to the dynamics of world politics during the Cold War. Finally, scholarship on international politics, war and peace in the 20th century and after has become increasingly internationalized with the opening of new archives and the incorporation of new perspectives. The aim of this volume is to serve as an overview and stimulant to research in this field, one that encompasses the broader definitions of strategy in current research, reflects the current state of world politics, and also takes a more global and less Western perspective.

Military Technology, Military Strategy and the Arms Race Marek Thee, 2025-03-03

First published in 1986, *Military Technology, Military Strategy and the Arms Race* argues that a principal factor contributing to the arms race is the military research and development (R&D) sector. It traces the arms race since World War II and explores the relationship between the emergence of new weapon technology, the development of new

weapon systems and their impact on strategic thinking It considers the positions for both the United States and its allies in NATO and for the erstwhile Soviet Union It argues that military R and D which consumes an increasing proportion of total funds spent on R and D has developed a self sustaining technological momentum which is baked by a powerful military industrial bureaucratic technological complex and is increasingly out of control of political leaders The book argues that negotiations to limit the numbers of weapons fail to address the main problem and that more emphasis should be given to considering ways of limiting and controlling military R and D It concludes by proposing a radical shift in policy to achieve this This historical reference work is important for scholars and researchers of military studies defence studies international relations diplomacy and international politics
