**Tome 1 Philosophie du langage, Logique philosophique / Volume 1 Philosophy of language, Philosophical logic** Guttorm Fløstad, G.H. Von Wright, 2012-12-06 The present publication is a continuation of two earlier series of chronicles Philosophy in the Mid Century Firenze 1958 59 and Contemporary Philosophy Firenze 1968 edited by Raymond KJibansky As with the earlier series the present chronicles purport to give a survey of significant trends in contemporary philosophical discussion The time space covered by the present series is approximately 1966 1978 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought particularly in philosophical logic and the philosophy of language the convergence of interest though not necessarily of opinion of different traditions upon certain problems and the increasing attention being paid to the history of philosophy in discussions of contemporary problems are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen the Socratic element of modern philosophy the dialogue or Kommunikationsgemeinschaft So far four volumes have been prepared for the new series The present chronicles in the Philosophy of Language and Philosophical Logic Vol I are followed by chronicles in the Philosophy of Science Vol II and Philosophy of Action Vol

**Reframing the Social** Professor Poe

Yu-ze Wan,2013-01-28 Drawing extensively on the research findings of natural and social sciences both in America and Europe *Reframing the Social* argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency Theoretically sophisticated and investigating the work of a theorist whose work has until now received insufficient attention in Anglo American thought this book will be of interest to those working in the field of social theory as well as scholars concerned with philosophy of social science the project of analytical sociology and the nature of the relationship between the natural and social sciences     **Roberto Gerhard** Monty Adkins,Rachel E. Mann,2022-11-10 Marking the 125th anniversary of the birth of Roberto Gerhard this work views the composer s life and oeuvre through the lens of the Spanish Civil War exile and cultural translation Through these different threads a new and more nuanced understanding of Gerhard and the political and cultural milieu that influenced his work emerges

**Explanation in the Special Sciences** Marie I. Kaiser,Oliver R. Scholz,Daniel Plenge,Andreas Hüttemann,2013-11-29 Biology and history are often viewed as closely related disciplines with biology informed by history especially in its task of charting our evolutionary past Maximizing the opportunities for cross fertilization in these two fields requires an accurate reckoning of their commonalities and differences precisely what this volume sets out to achieve Specially commissioned essays by a team of recognized international researchers cover the full panoply of topics in these fields and include notable contributions on the correlativity of evolutionary and historical explanations applying to history the latest causal mechanical approach in the philosophy of biology and the question of generalized laws that might pertain across the two subjects The collection opens with a vital interrogation of general issues on explanation that apart from potentially fruitful areas of interaction could the etiology of the causal mechanical perspective in biology account for the historical trajectory of the Roman Empire this volume also seeks to chart relative certainties distinguishing explanations in biology and history It also assesses techniques such as the use of probabilities in biological reconstruction deployed to overcome the inevitable gaps in physical evidence on early evolution Methodologies such as causal graphs and semantic explanation receive in depth analysis Contributions from a host of prominent and widely read philosophers ensure that this new volume has the stature of a major addition to the literature     *The Question of Hermeneutics* T.J. this work nominalism and contemporary nominalism is philosophical it cannot be fully treated without relating it to data gathered from a great variety of domains such as biology and more especially ethology psychology linguistics and neurobiology The source of inspiration has been an academic work I wrote in order to obtain a postdoctoral degree which is called in Belgium an Aggregaat voor het Hoger Onderwijs comparable to a Habilitation in Germany I want to thank the National Fund of Scientific Research which accorded me several grants and thereby enabled me to write the academic work in the first place and thereafter this book I also want to thank Prof SJ Doorman Technical University of Delft and Prof G Nuchelmans University of Leiden who were members of the jury of the Aggregaatsthesis presented to the Free University of

Brussels in 1981 and who by their criticisms and suggestions encouraged me to write the present book the core of which is constituted by the general ideas then formulated I am further obliged to Mr X the referee who was asked by Jaakko Hintikka to read my work and who made a series of constructive remarks and recommendations My colleague Marc De Mey University of Ghent helped me greatly with the more formal aspects of my work and spent too much of his valuable time and energy to enable me to deliver a presentable copy All remaining shortcomings are entirely my responsibility I asked Prof

Niels Bohr and Contemporary Philosophy J. Faye, H. Folse, 2013-03-09 Since the Niels Bohr centenary of 1985 there has been an astonishing international surge of scholarly analyses of Bohr's philosophy Now for the first time in Niels Bohr and Contemporary Philosophy Jan Faye and Henry Folse have brought together sixteen of today's leading authors who have helped mould this new round of discussions on Bohr's philosophy In fifteen entirely new previously unpublished essays we discover a surprising variety of the different facets of Bohr as the natural philosopher whose framework of complementarity shaped the final phase of the quantum revolution and influenced two generations of the century's leading physicists There is much on which the authors included here agree but there are also polar disagreements which assure us that the philosophical questions revolving around Bohr's new viewpoint will continue to be a subject of scholarly interest and discussion for years to come This collection will interest all serious students of history and philosophy of science and foundations of physics
