Contemporary Issues in Islam Asma Afsaruddin, 2015-08-31 This book

deals with certain hot button contemporary issues in Islam that are often the focus of public scrutiny including the Shariah, jihad, the caliphate, women's status and interfaith relations. Notably, it places the discussion of these topics within a longer historical framework in order to reveal their multiple interpretations and contested applications over time. Most public and some academic discourses, however, present the Islamic tradition as unchanging and therefore unable to respond to the modern world. Such an ahistorical approach fosters the belief that Muslim and Western societies are destined to clash with one another. In contrast, this book allows the reader to see the diversity and transformations within Islamic thought over time. Focusing on this internal diversity permits us to appreciate the scriptural and intellectual resources available within the Islamic tradition for responding to the challenges of modernity even as it interrogates and shapes modernity itself. **Islam and Disability** Mohammed Ghaly, 2009-12-21 This book explores the position of Islamic theology and jurisprudence towards people with disabilities. It seeks to reconcile their existence with the concept of a merciful God and also looks at how this group might live a dignified and productive life within an Islamic context. *Contemporary Issues in African Administration and Development Politics*, 1990 **Tafsir Ishraq Al-Ma'an** SYED IQBAL ZAHEER, 2008-06-03 About The Book With the revival of interest in Islam in our times, the Qur'an is also being read increasingly, especially by the intellectuals. Muslims and non-Muslims alike. However, and although its message and central theme have been stated in unambiguous terms, its translation fails to impart the same meaning with the same effect. Additionally, the Qur'an deals with every subject of human concern and gives guidelines for application to life and society. This increases its scope widely and requires, on the part of the reader, knowledge of various disciplines for proper appreciation of its message. It is specially important to know how the Qur'an was understood by those who received it first: Prophet Muhammad SAW, on whom be Allah's peace, and his immediate followers. Second in order of interest and importance would be to know how the scholars of Islam have understood it in every age. *Muslim Medical Ethics* Jonathan E. Brockopp, Thomas Eich, 2021-02-09 A timely exploration of balancing Islamic heritage with contemporary medical and health concerns. *Muslim Medical Ethics* draws on the work of historians, health care professionals, theologians and social scientists to produce an interdisciplinary view of medical ethics in Muslim societies and of the impact of caring for Muslim patients in non-Muslim societies. Edited by Jonathan E. Brockopp and Thomas Eich, the volume challenges traditional presumptions of theory and practice to demonstrate the ways in which Muslims balance respect for their heritage with the health issues of a modern world. Like members of many other faiths, Muslims are deeply engaged by the technological challenges posed by modern biomedicine and they respond to those challenges with enormous creativity, whether as patients, doctors or religious scholars. *Muslim Medical Ethics* demonstrates that religiously based cultural norms often inform medical practice and vice versa in an ongoing discourse. The contributors map the breadth and boundaries of this discourse through discussions of contested issues on the cutting edge of ethical debates: from fertilized embryos in Saudi Arabia to patient autonomy in Toronto, from organ trafficking in Egypt to sterilization in Tanzania. As the

authors illustrate the effects of Muslim medical ethics have ramifications beyond the Muslim world. With growing populations of Muslims in North America and Europe, Western physicians and health care workers should be educated on the special needs of this category of patients. In every essay, the richness of the Islamic tradition is visible. In the premodern period, Muslim physicians were considered among the best in the world, building and improving on Greek and Indian traditions. Muslim physicians today continue that tradition while incorporating scientific advances. Scholars of Islamic law work closely with physicians to develop ethical guidelines for national and international bodies, and individual Muslims take full advantage of advances in medicine and religious law, combining them with the wisdom of Sufism and traditions of family and community. This exploration of Muslim medical ethics is therefore a foray into the richness and sophistication of the Islamic tradition itself. Designed as an engaging point of entrance for students in religious studies, anthropology, ethics, and medical humanities, this pathbreaking volume also has utility for health care professionals and policy makers.

Books-in-Brief: Ethics of Assisted Reproductive Medicine Sharmin Islam, Shiraz Khan, 2015-12-01. Ethics of Assisted Reproductive Medicine compares and contrasts Western and Islamic models of bioethics to make the case that the Islamic perspective taken from the Qur'an and the Sunnah provides a viable and clear alternative that goes beyond the dominance of the secular and its various philosophical bases to give Revelation and spiritual understanding precedence. Human cloning, surrogacy, and IVF are some of the more hotly contested topics. The author analyzes these rigorously and objectively, addressing the perspectives of both the secular Western and Islamic models and fundamentally how each has chosen to framework its own understanding of the issues at hand. In discussing these issues, keeping to principles, the author charts the way out of a confused circle of opinion that is making it very hard to decide what is best.

Lifestyle in Medicine Emily Hansen, Gary Easthope, 2007-01-24. Topical Issue given increasing individual responsibility in healthcare, e.g. in the UK, Patient's contracts. Looks at professional and lay perspectives on health and illness. Evidence-based analysis using original research.

Islamic Counselling G. Hussein Rassool, 2015-07-16. Islamic counselling is a form of counselling which incorporates spirituality into the therapeutic process. Until now, there has been little material available on the subject with no one agreed definition of Islamic counselling and what it involves. There has also been a rapidly growing population of Muslims in Western societies with a corresponding rise in need of psychological and counselling services. *Islamic Counselling: An Introduction to theory and practice* presents a basic understanding of Islamic counselling for counsellors and Islamic counsellors and provides an understanding of counselling approaches congruent with Islamic beliefs and practices from a faith-based perspective. The book is designed as an introduction for counsellors; its goal is to inform the reader about how the diverse roles of the Islamic counsellor fit together in a comprehensive way and to provide the guidelines that can be potentially integrated into a theoretical framework for use. The book is divided into two parts: Section one, Context and Background, and Section two, Assessment Models and Intervention Strategies. Islamic Counselling encompasses both current theory, research, and an awareness of the practice implications in

delivering appropriate and effective counselling interventions with Muslim clients It will be essential reading for both professionals and students alike Contemporary Issues in the Islamic World Irfan Abubakar, Cheyne Scott, 2008 Translation of a number of small books in Indonesian on contemporary issues in Islam which were published by the PBB UIN P ix
