Scripture for Sound and Performance James A. Maxey, Ernst Wendland, 2012-11-01 The various studies presented in this anthology underscore the foundational matter of translation in biblical studies as understood from the specific perspective of Biblical Performance Criticism If the assumption for the biblical messages being received is not individual silent reading then the question becomes how does this public performative mode of communication affect the translation of this biblical material Rather than respond to this in general theoretical terms most in this collection of articles offer specific applications to particular Hebrew and Greek passages of Scripture Almost all the authors have firsthand experience with the translation of biblical materials into non European languages in communities who maintain a vibrant oral tradition The premise is that the original Scriptures which were composed in and for performance are being prepared again for live audiences who will receive these sacred texts not primarily in printed form but first and foremost in community by means of oral and visual media This volume is an invitation for others to join us in researching more intensely this intersection of sound performance and translation in a contemporary communication of the Word **Septuagint, Sages, and Scripture** Randall X.

Gauthier, Gideon Kotzé, Gert Steyn, 2016-11-14 The studies collected in this volume were written in honour of Johann Cook emeritus professor of the Department of Ancient Studies at Stellenbosch University They cover a variety of subjects including

the translation of Hebrew expressions into Greek the reception of LXX texts in various contexts topics related to wisdom and the LXX versions of sapiential literature Ben Sira as a scribe of the Second Temple period themes in the works of Philo and Josephus and the references to Sumkhos ben Joseph in rabbinic writings The contributions therefore focus on the Septuagint early Jewish sages and ancient scriptures They present the results of original research identify new lines and topics of inquiry and make novel contributions to existing insights

Words and Processes in Mambila Kinship David Zeitlyn, 2005-01-01

Excursions in Realist Anthropology David

Zeitlyn,2014-10-16 Realism has become a dirty word in some social sciences yet despite fashionable new approaches involving multiple ontologies and the like when anthropologists actually produce ethnographic accounts they are still indulging in realism in some form Perhaps this is why ethnography too is unfashionable Given the authors background as anthropologists committed to fieldwork this book provides a theoretical grounding to justify and explain the sorts of accounts that anthropologists produce as the result of ethnographic research The book s approach starts from an acceptance that understanding is always incomplete always improvable This sort of partiality is viewed throughout the book as a strength The challenge of anthropology is that it involves forms of translation often across languages but always between the unstated and the explicit Accepting provisionality and incompleteness in the resulting translations provides ways of finding a middle ground between extreme versions of positivism and relativism As such this book argues for moderate realisms in a dappled world *Handbook of Translation Studies* Yves Gambier,Luc van Doorslaer,2010 Moreover many items in the reference lists are hyperlinked to the TSB where the user can find an abstract of a publication All articles between 500 and 6000 words are written by specialists in the different subfields and are peer reviewed Last but not least the usability accessibility and flexibility of the HTS depend on the commitment of people who agree that Translation Studies does matter All users are therefore invited to share their feedback Any questions remarks and suggestions for improvement can be sent to the editorial team

Architecture and the Image at the Turn of the 21st Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies
