Contemporary Women Teachers Balancing School And Home:

Contemporary Women Teachers Dee Ann Spencer,1986 **Teachers, Gender, and Careers** Sandra Acker,1989
Teachers experiences are seen to be influenced by cultures within educational institutions labour market conditions and social divisions This book attempts to move gender from the margins to the centre of debate about their lives and careers

Realities of Teachers' Work Sandra Acker,1999-04-01 The Realities of Teacher Work Never a Dull Moment follows the fortunes of the teachers at Hillview Primary School over ten years It explores what it is like to be a primary or elementary school teacher in an urban school with about 200 children mixed in social class and ethnicity and suggests what we may learn from them for the future Sandra Acker links her research with other literature on teachers work and describes the school as a workplace focusing on four key features the characteristics of the children the school s physical setting the available resources and the ethos of the school She successfully places us in the classroom giving vivid images of daily interactions with the children and shows too how teaching extends far beyond the classroom door The book explores the caring culture that has developed among the teachers and helps them to cope with the difficulties they encounter It also considers the school as located in the wider community by looking at changes in teachers careers over time and the effects on Hillview of recent educational reform This book shows us how and why we need to revise our assumptions about schools and teachers and see them not as isolated individuals in closed classrooms and self contained schools but as an integral part of a much broader community Above all it shows that teaching is hard demanding work that is influenced by workplace cultures and the gendered expectations society holds about teachers **Teacher Education: Professionalism, social**

justice and teacher education David Hartley,Maurice Whitehead,2006 **Teaching Diverse Populations** Etta R. Hollins,Joyce E. King,Warren C. Hayman,1994-01-25 This book presents current knowledge about teaching culturally diverse populations traditionally underserved in the nation s public schools It approaches the challenge of improving public school education for these students in a variety of ways including relating of cultural and experiential knowledge to classroom instruction examining the behaviors of teachers who are effective with culturally diverse populations analyzing effective school models reviewing models of effective instruction and exploring ethnic identity as a variable in the formula for school success The discussions reveal significant insights about the implications and shortcomings of existing knowledge and its application and offer directions for future research **The Worth of Women's Work** Anne Statham,Eleanor M.

Miller,1988-01-01 Many common assumptions about work are challenged in this book For example the findings refute the common assertion that work tasks can be categorized into instrumental or task activities versus caretaking or people oriented activities It is shown that regardless of the type of job tasks are accomplished through the management of relationships Other findings show that workers devise ingenious methods for maintaining dignity in the face of blatant oppression a conclusion neglected in traditional studies of work where prestige hierarchies are presumed to affect workers

feelings about themselves This book integrates findings from qualitative studies of women s work experiences in 13 occupations The methods for gathering the data include participant observation unstructured interviews analysis of diaries and review of historical documents These methodologies permit unanticipated patterns to emerge from the data Hence The Worth of Women s Work not only presents new insights into women s work experiences but simultaneously takes a much needed step in developing a framework for integrating qualitative research

International Handbook of Teachers and Teaching Bruce J. Biddle,T.L. Good,I. Goodson,2013-11-11 Recent years have generated a huge increase in the number of research and scholarly works concerned with teachers and teaching and this effort has generated new and important insights that are crucial for understanding education today This handbook provides a host of chapters written by leading authorities that review both the major traditions of work and the newest perspectives concepts insights and research based knowledge concerned with teachers and teaching Many of the chapters discuss developments that are international in scope but coverage is also provided for education in a number of specific countries Many chapters also review contemporary problems faced by educators and the dangers posed by recent politically inspired attempts to reform schools and school systems The Handbook provides an invaluable resource for scholars teacher educators graduate students and all thoughtful persons concerned with the best thinking about teachers and teaching current problems and the future of education

Studying Teachers' Lives I Goodison,2013-02-01 To develop a mode of educational research which speaks both of and to the teacher we require more study of the lives of teachers This book provides a vital insight into the ways in which teachers backgrounds and career histories affect their teaching methods and approaches Many issues are covered ranging from the question of teacher drop out to the importance of teacher socialisation The studies employ a range of different methodologies allowing the reader to assess their varying strengths and weaknesses but throughout they reaffirm the centrality of the teacher in educational research

Research In Physical Educ.& Sp Andrew Sparkes,2012-10-12 The text aims to provide an in depth exploration of a range of traditions that are beginning to reshape the nature of research in physical education and the sports sciences The chapters are all original contributions by leading scholars that bring together new data from a variety of research approaches Each offers its own specific challenge to the orthodoxy that has dominated the field A range of traditions are considered by the contributors who provide specific examples from their own work that include phenomenology ethnography life histories discourse analysis feminist research curriculum history and action research These cases are highlight for the reader the basic assumption of each approach the significance of the understanding they develop and their potential for the future development of research in physical education and sport The forms of analysis provided should be of interest to a wider audience such as students of education and the social sciences It is aimed at physical education researchers BEd MEd BSc MSc courses on physical education and sport and teachers of sports science
