In the Greek world under the Roman Empire the tradition of rhetorical learning reached its heyday in the second century A D with the cultural movement named as Second Sophistic Despite the emphasis on rhetoric literary culture *latro senso* was also part of it granting a special place to poetics and literary criticism In the wake of this hermeneutical and interdisciplinary approach the papers assembled in this volume explore significant issues which are linked to the narrative structure of the ancient novel and to the tradition of rhetorical training both envisaged as a web of well constructed narrative devices

**Introduction to African American Studies** Talmadge Anderson, James Benjamin Stewart, 2007

There is an ongoing debate as to whether African American Studies is a discipline or multidisciplinary or interdisciplinary field Some scholars assert that African American Studies use a well defined common approach in examining history politics and the family in the same way as scholars in the disciplines of economics sociology and political science Other scholars consider African American Studies multidisciplinary a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses be they anthropological psychological historical etc to study the African world experience In this model the boundaries between traditional disciplines are accepted and researches in African American Studies simply conduct discipline based an analysis of particular topics Finally another group of scholars insists that African American Studies is interdisciplinary an enterprise that generates distinctive analyses by combining perspectives from d

**The Rise and Fall of Jewish American Literature** Benjamin Schreier, 2020-10-16

Benjamin Schreier argues that Jewish American literature's dominant cliché of breakthrough is the irruption into the heart of the American cultural scene during the 1950s of Jewish American writers like Bernard Malamud Philip Roth Saul Bellow and Grace Paley must also be seen as the critically originary moment of Jewish American literary study According to Schreier this is the primal scene of the Jewish American literary field

the point that the field cannot avoid repeating and replaying in instantiating itself as the more or less formalized academic study of Jewish American literature More than sixty years later the field's legibility the very condition of its possibility remains overwhelmingly grounded in a reliance on this single ethnological narrative In a polemic against what he sees as the unexamined foundations and stagnant state of the field Schreier interrogates a series of professionally powerful assumptions about Jewish American literary history how they came into being and how they hardened into cliché He offers a critical genealogy of breakthrough and other narratives through which Jewish Studies has asserted its compelling self-evidence not simply under the banner of the historical realities Jewish Studies claims to represent but more fundamentally for the intellectual and institutional structures through which it produces these representations He shows how a historicist scholarly narrative quickly consolidated and became hegemonic in part because of its double articulation of a particular American subject and of a transnational historiography that categorically identified that subject as Jewish The ethnological grounding of the Jewish American literary field is no longer tenable Schreier asserts in an argument with broad implications for the reconceptualization of Jewish and other identity-based ethnic studies

Dowd, 2025-02-03 Early Modern Women's Writing and the Future of Literary History demonstrates that a full accounting of early modern women's literary and creative activities is necessary to the future of literary studies writ large Despite benefiting from a rich body of scholarship and diverse critical practices early modern women's writing is still treated as an optional or secondary component of Renaissance literary studies as a whole In this book Dodds and Dowd offer a state-of-the-field assessment of the critical and theoretical debates that have resulted in this state of affairs in order to advance specific visions for the future Dodds and Dowd examine how perennial questions about authorship canon and literary value have historically influenced scholarship on early modern women's writing and its place within literary studies Early modern women's writing has been perceived as belated out of sync with dominant critical trends Dodds and Dowd show the belatedness of early modern women's writing to be a happy accident that positions women's writing as a resource for the renewal of literary history In both the classroom and in scholarship early modern women's writing shows the way forward for the field whether in the revitalization of formalist approaches to literature through an alliance with feminism or in the integration of newer critical methodologies such as premodern critical race studies This book demonstrates that a feminist literary history that places women's writing at its center is essential to the future of English Renaissance literary studies There is in other words no history of English Renaissance literature without women writers      A Reader's Guide to Contemporary Literary Theory Raman Selden, Peter Widdowson, Peter Brooker, 2005

The fifth edition of this reader's guide remains true to the ideals of previous editions providing a concise guide to contemporary literary theories. The book covers a vast range of differing forms of English literature.
