

The background of the image is a photograph of a sunset. The sun is a bright yellow-orange orb on the right side, partially obscured by the text. It casts a long, colorful glow across the sky, transitioning from yellow to orange to a deep red. In the foreground, there is a field of tall, dry grass in shades of brown and orange. In the background, there are dark silhouettes of trees and a line of hills.

Mathematical Intuition R.L. Tieszen, 2012-12-06 Intuition has perhaps been the least understood and the most abused term in philosophy It is often the term used when one has no plausible explanation for the source of a given belief or opinion According to some sceptics it is understood only in terms of what it is not and it is not any of the better understood means for acquiring knowledge In mathematics the term has also unfortunately been used in this way Thus intuition is sometimes portrayed as if it were the Third Eye something only mathematical mystics like Ramanujan possess In mathematics the notion has also been used in a host of other senses by intuitive one might mean informal or non rigorous or visual or holistic or incomplete or perhaps even convincing in spite of lack of proof My aim in this book is to sweep all of this aside to argue that there is a perfectly coherent philosophically respectable notion of mathematical intuition according to which intuition is a condition necessary for mathematical knowledge I shall argue that mathematical intuition is not any special or mysterious kind of faculty and that it is possible to make progress in the philosophical analysis of this notion This kind of undertaking has a precedent in the philosophy of Kant While I shall be mostly developing ideas about intuition due to Edmund Husserl there will be a kind of Kantian argument underlying the entire book **Philosophy of Mind/Philosophie de l'esprit**

Guttorm Fløistad, 2012-12-06 This publication is a continuation of two earlier series of chronicles *Philosophy in the Mid Century* Firenze 1958-59 and *Contemporary Philosophy* Firenze 1968 edited by Raymond Klibansky Like the other series these chronicles provide a survey of important trends in contemporary philosophical discussion from 1966 to 1980 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for

various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought particularly in philosophical logic and the philosophy of language the convergence of interest though not necessarily of opinion of different traditions upon certain problems and the increasing attention being paid to the history of philosophy in discussions of contemporary problems are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen the Socratic element of modern philosophy the dialogue or Kommunikationsgemeinschaft So far four volumes have been prepared for the new series The present chronicles in the Philosophy of Mind Vol 4 follow upon chronicles in the Philosophy of Language and Philosophical Logic Vol 1 and chronicles in the Philosophy of Science Vol 2 and chronicles in the Philosophy of Action Vol 4

mathematical persuasion Dag Prawitz also writes a chapter in which he explains his current views on the epistemic dimension of proofs and addresses the question why some inferences succeed in conferring evidence on their conclusions when applied to premises for which one already possesses evidence Computational Argumentation: a Foundation for Human-centric AI Antonis Kakas,Loizos Michael,Emmanuelle Dietz,2024-11-19 Human centric AI aims at designing and developing systems that operate along with humans in a cognitively compatible and synergetic way Such systems are required to exhibit human like cognitive abilities and intelligence either at the general level of the human population or at some specialized level of expertise in a specific field In either case human centric AI systems exist as expert companions or peers of their human users that would operate alongside them to support and enhance their capabilities Handbook of Epistemology I. Detlefsen,2013-03-09 Hilbert s Program was founded on a concern for the phenomenon of paradox in mathematics To Hilbert the paradoxes which are at once both absurd and irresistible revealed a deep philosophical truth namely that there is a discrepancy between the laws accord ing to which the mind of homo mathematicus works and the laws governing objective mathematical fact Mathematical epistemology is therefore to be seen as a struggle between a mind that naturally works in one way and a reality that works in another Knowledge occurs when the two cooperate Conceived in this way there are two basic alternatives for mathematical epistemology a skeptical position which maintains either that mind and reality seldom or never come to agreement or that we have no very reliable way of telling when they do and a non skeptical position which holds that there is significant agree ment between mind and reality and that their potential discrepan cies can be detected avoided and

thus kept in check Of these two Hilbert clearly embraced the latter and proposed a program designed to vindicate the epistemological riches represented by our natural if non literal ways of thinking Brouwer on the other hand opted for a position closer in Hilbert's opinion to that of the skeptic Having decided that epistemological purity could come only through sacrifice he turned his back on his classical heritage to accept a higher calling *Aspects of Aesthetics* Göran Hermerén,1983 *All Under Heaven* John H. Berthrong,1994-03-22 This book is a study of comparative philosophy and theology The themes are the critical issues arising from the modern interpretation of Confucian doctrine as they confront the Christian beliefs of the nineteenth and twentieth centuries *Handbook of Social Choice and Welfare* Kenneth J. Arrow,A. Sen,Kotaro Suzumura,2010-10-13 This second part of a two volume set continues to describe economists efforts to quantify the social decisions people necessarily make and the philosophies that those choices define Contributors draw on lessons from philosophy history and other disciplines but they ultimately use editor Kenneth Arrow's seminal work on social choice as a jumping off point for discussing ways to incentivize punish and distribute goods Develops many subjects from Volume 1 2002 while introducing new themes in welfare economics and social choice theory Features four sections Foundations Developments of the Basic Arrowian Schemes Fairness and Rights and Voting and Manipulation Appeals to readers who seek introductions to writings on human well being and collective decision making Presents a spectrum of material from initial insights and basic functions to important variations on basic schemes *Three Faces of Hermeneutics* Roy J. Howard,2023-11-15 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982
